IN THE MATTER OF THE JOINT NOTICE AND). DOCKET NOS. T-01051B-10-0194 APPLICATION OF OWEST CORPORATION, OWEST COMMUNICATIONS COMPANY, LLC, **OWEST LD CORP., EMBARQ** COMMUNICATIONS, INC. D/B/A CENTURY LINK COMMUNICATIONS, EMBARO PAYPHONE SERVICES, INC. D/B/A CENTURYLINK, AND CENTURYTEL SOLUTIONS, LLC FOR APPROVAL OF THE PROPOSED MERGER OF THEIR PARENT CORPORATIONS OWEST COMMUNICATIONS) INTERNATIONAL INC. AND CENTURYTEL, INC.

PAETEC'S EXCEPTIONS TO THE RECOMMENDED OPINION AND **ORDER**

McLeodUSA Telecommunications Services, Inc. d/b/a PAETEC Business Services ("PAETEC") submits its Exceptions to the Recommended Opinion and Order ("ROO") of the Administrative Law Judge ("ALJ") in this docket. These exceptions focus on the potential adverse impact of the proposed merger on the Operations Support Systems ("OSS") that Competitive Local Exchange Carriers ("CLECs"), such as PAETEC, rely upon to order, provision and repair key services and facilities from Qwest. The OSS is critical to facilitating telecommunications competition in Arizona and ensuring that Arizona consumers enjoy the full benefits of such In order to ensure that the post-merger OSS used in Arizona will not harm competition, the Commission should amend the ROO to require three simple – but important -additional conditions to the approval of the proposed merger. PAETEC has provided proposed amendment language in Attachment A.

INTRODUCTION

The proposed merger presents significant risk to competition and, therefore, the public interest, particularly relating to the continued availability of efficient, reliable, accurate OSS that CLECs use to obtain elements and services from Qwest. In order to mitigate that risk, PAETEC urges the Commission to adopt conditions, in addition to those reflected in the Settlement Agreement entered into between the Joint Applicants and Commission Staff ("Staff Settlement Agreement"), to assure that CLEC access to OSS is not degraded as a result of the merger. The FCC found that CLECs would be "severely disadvantaged, if not precluded altogether, from fairly competing," if they did not have nondiscriminatory access to OSS. As the Commission Staff witness observed:

The number one issue is the change in access to critical wholesale services and the decline in competitiveness that would result from changes to OSS services that could impact CLECs disproportionately compared to Qwest's retail organizations. The OSSs are essential, for example, in the ordering, installation and repair of unbundled network elements ("UNEs"), one of which is the last mile loop essential to many CLECs using wholesale services.²

Owest itself has described its existing OSS as playing "a crucial role in the transactions between Qwest and all CLECs" and "the lifeblood of... Qwest's wholesale operation..."

It is critical to understand that Qwest owns and controls much of the legacy telecommunications network used to access consumers in Arizona by virtue of its (and its predecessors) historical role as the monopoly provider in Arizona. CLECs are dependent on using portions of that network and on Qwest's related cooperation in providing such use. However, Owest is also a key competitor of the CLECs. As a result, any interference in the process for ordering, provisioning and repairs related to the legacy network – which requires access to a robust

OSS that provides nondiscriminatory access to the critical network elements and services – will give Owest a competitive advantage.

In order to protect against the harm to competition and the public interest that would potentially result from replacement of the existing Qwest OSS with functionally inferior OSS following the merger, PAETEC requests that the Commission condition its approval of the merger on the following additional or clarified commitments regarding OSS contained in Condition No. 19 of the Staff Settlement Agreement:

- a commitment to maintain Owest's existing OSS for at least three years to match **(1)** the Joint Applicants' 3-5 year synergy period;
- a commitment that any change in OSS will not adversely impact the operations of **(2)** CLECs' back office systems; and
- a commitment to, in connection with changes to Qwest OSS, conduct third party (3) testing to assure that specific components of wholesale OSS service quality. including support, data, billing, functionality, performance, electronic flow through and electronic bonding, are not degraded.

Accordingly, PAETEC requests that the Commission amend the ROO's Findings of Fact, Paragraphs 152, 155, and 161, and add a related Ordering Paragraph beginning at page 57, line 23, in the manner set forth in the accompanying proposed amendments (Attachment A).

DISCUSSION

I. The Record Establishes That The Proposed Merger Presents Substantial Risk To **Competition And The Public Interest.**

The record shows that two out of three mergers fail.⁵ Further, the evidence showed that mergers between ILECs in the telecommunications industry have been particularly risky, resulting in service failures and delays for consumers and competitors and bankruptcy for the post-merger companies. 6 Indeed, the Commission's Staff observed that the proposed merger presents the

potential for irreparable harm to competition.

CenturyLink's consistent response to this evidence has been to point to what it describes as a "track record" of successful acquisitions. 8 This response, however, fails to take into account a number of critical facts that show that the Commission cannot assume, based on CenturyLink's recounting of its claimed past successes, that this transaction is free from risk. First, CenturyLink ignores the fact that, as the ALJ correctly noted, "the Embarg integration has not been without its difficulties." Indeed, characterizing the integration of Embarg as not being free from "difficulties" is an understatement. Testimony provided by the Commercial Workers of America describes a number of serious operational, service-affecting problems stemming from efforts to integrate the Embarg business in North Carolina. 10 Second, CenturyLink's response ignores the fact that integration of its largest acquisition to date, Embarg, has not yet been completed. 11 Indeed, the integration of Embarq will likely still be ongoing at the consummation of the proposed merger and may affect the resources available to ensure that the Owest integration will not harm competition or consumers in Arizona.

Finally, what this response ignores is that this transaction is not like any transaction in which CenturyLink has previously been involved. Qwest is much larger than any company that CenturyLink has previously acquired and has a substantially more urban, more densely-populated footprint. 12 CenturyLink's traditional focus of operations on less densely populated areas means that it has not faced the level of competition and wholesale service demand that Qwest has faced in

operating in the larger metropolitan areas. 13 These challenges of the transaction have led bond ratings agencies to pessimistic predictions of future success. Thus, Moody's Investor Service, in changing the company's outlook to negative, observed that, "The negative rating outlook for Century Tel reflects the considerable execution risks in integrating a sizable company so soon after another acquisition (Embarg in July 2009) while confronting the challenges of a secular decline in the wireline industry. The negative outlook also considers the possibility that the Company may not realize planned synergies in a timely manner, especially as competitive intensely increases."14

CenturyLink points to its experience operating in Las Vegas, as a result of its acquisition of Embarq, as demonstrating its ability to effectively serve urban areas. 15 Both CenturyLink and the ROO, however, ignore the evidence of significant problems that have arisen as CenturyLink has implemented its EASE OSS in Embarg's Nevada territory. To that end, Kim Howell of Cox Telecom testified:

The integration of Embarg and the transition to CenturyLink EASE OSS has been and continues to be problematic. Today in Nevada, the EASE system has negatively affected our response time for customer orders to switch phone service from CenturyLink to Cox. At times of high volume, our submitted orders will sometimes time-out, crash or experience other problems. We are frequently on the phone with CenturyLink representatives trying to recover orders that are lost We continue to be frustrated with the inability to meet our customer's requests on a timely basis and be competitive with CenturyLink when our orders are lost in their operating system. We have found in many cases we are having to call our customers back and push the installation date out as a result of the points of failure in the CenturyLink system.

Cox also observes that CenturyLink is very slow to address OSS problems and that the number of issues has not materially decreased over time. ¹⁷ Along these same lines, Mr. Gates attaches to his

¹³ See, e.g., Ex. CLT-1 (Glover Direct), Ex. JG-4 (Owest acquisition "increases the company's exposure to higher density markets, which have significant competition from cable providers."

¹⁴ Ex. CLT-1 (Glover Direct), Ex. J6-3; see also Ex. CLT-1 (Glover Direct), Ex. j6-4 ("While estimated operating cost synergies of about \$575 million, which represent about 3% of total revenue, appear achievable, integration efforts will be difficult given the size of the combined company and CenturyTel's integration of previously acquired Embarq will likely not be complete until the end of 2011."); see also ROO at ¶¶ 91-92.

⁵ See ROO ¶ 74.

¹⁷ Ex. Cox-2 (Howell Surrebuttal) at page 13, lines 9-18.

testimony comments submit to the FCC by tw telecom and Socket Telecom recounting problems they experienced in 2009 – including system outages that prevented the submission of LSRs, inability to complete pre-ordering, and slow response times – during CenturyLink's transition of wholesale customers in legacy Embarq territory from one ordering system to another.¹⁸

Furthermore, CenturyLink lacks anything approaching Qwest's experience in providing wholesale service. As Joint CLEC witness, Mr. Gates, explained, the Joint Applicants' own data shows that by a number of different measures, CenturyLink's wholesale business is *significantly less* than Qwest's for such things as processing porting requests. ¹⁹ As the Commission knows, number porting is essential for competition because consumers expect to retain their telephone numbers when they switch from the ILEC to a competitive provider. If consumers cannot retain their phone number or ensure that their telephone numbers will transfer immediately and seamlessly when changing providers, then consumers will be reluctant to change providers. Therefore, if CenturyLink and Qwest cannot process number porting requests quickly, and efficiently, following the merger, competitors and competition will suffer. Other comparisons of Qwest's and CenturyLink's wholesale service volumes are similarly lop-sided.²⁰

Finally, and most importantly for purposes of PAETEC's Exceptions, Qwest is Arizona's Regional Bell Operating Company ("BOC"), with specific wholesale obligations and responsibilities under Sections 271 and 272 of the 1996 Telecommunications Act to open markets to competition. CenturyLink, in contrast, has never operated as a BOC and has never been required to perform to the legal standards that apply to a BOC.²¹ Most significantly, CenturyLink did not go through the Section 271 process, including rigorous independent testing of its OSS, that Qwest had to go through in order to enter the interLATA market.²²

II. The Commission Should Condition Its Approval Of The Merger On The Merged Company's Commitment To Continue Using Qwest's Existing OSS For At Least Three Years.

Recognizing the importance of OSS to the continued vitality of competition in local telecommunications markets, Commission Staff initially urged the Commission to adopt a requirement that the Merged Company continue to use Owest's existing OSS for a period of at least three years after the merger.²³ Later, although describing the CLEC request for a three year OSS commitment as "reasonable," Staff nonetheless entered into a settlement providing for only a two year commitment as a "compromise." The record does not support a conclusion that the Staff's compromise adequately furthers the public interest in protecting competition.

There is no dispute regarding the critical importance of OSS to the ability of CLECs to compete. Moreover, the Joint Applicants acknowledge their plan to ultimately transition to a single OSS platform and that, by doing so, they expect to realize expense saving.²⁵ Further, the overwhelming weight of the evidence shows that Owest's OSS provides CLECs with greater functionality than is available through CenturyLink's OSS. Indeed, as Mr. Fimbres of Commission Staff testified, "Qwest's OSS appear to be superior to both the Embarq and CenturyLink systems. It could be unacceptable, given the substantial time invested by the Commission and others in the Owest 14 state region during the § 271 process to adopt changes to Qwest's support systems that are inferior to what is now available."²⁶

One very significant difference between Qwest's OSS and CenturyLink's OSS that affects a wide variety of CLEC operations is the difference to which those systems accommodate "ebonding" that allows the automated, real-time transfer of information between the CLEC and ILEC systems. Owest's OSS uses an e-bonding system that allows faster and more accurate exchange of information and forms than CenturyLink's systems.²⁷ This e-bonding functionality enables PAETEC to make greater use of automated systems that reduce costs and delays by eliminating manual process errors and the re-processing that such errors require.²⁸ These automated capabilities are possible because the CLEC undertook a substantial effort to develop its own back end systems and processes and then code, test and link those systems and processes to Owest's systems and interfaces. These CLEC back end systems would be potentially impacted if the merged company changed Owest's legacy OSS post-transaction and such change could require CLECs to revert to significantly less efficient manual processes if the modified OSS offered by the merged company does not afford CLECs access to the same degree of the merged company's back end systems and data via the electronic interface.²⁹

A three year moratorium on changes to the Qwest OSS is reasonable because it is tied to the three to five year period over which the Joint Applicants project that merger synergies will be realized.³⁰ It took more than three years just to test and evaluate Qwest's OSS to determine if it was sufficient to meet the requirements of Section 271.31 If the merged company decides to modify or replace Owest's OSS, it is reasonable to assume that it will take at least three years (i) to decide which OSS the merged company intends to use going forward, (ii) to make changes to Qwest's OSS, (iii) to test and evaluate the new OSS to ensure that it can handle the commercial

²⁷ Ex. Cox -1 (Howell Direct), page 5, lines 15-17; see also Ex. Cox-1 (Howell Direct), page 5, lines 18-22 ("Owest allows electronic submission of LSRs and ASRs through e-bonding and a web-based portal, respectively. CenturyLink, even in the Embarq territories, does not have e-bonding for most LSRs, and uses a more manual, non-interactive internet ordering processes for ASRs for interconnection trunks.")

volumes in Owest's territory and provide CLECs a meaningful opportunity to compete, (iv) to allow cooperative testing of the systems with the CLECs to ensure that they meet the CLEC needs; and (v) for CLECs to develop internal systems to interface with the new OSS systems.³²

The two year period provided for under the Staff Settlement, in contrast, finds no basis in the record, beyond the fact that this was a period of time that another CLEC—Integra—found acceptable. In entering into its settlement agreement, Integra represented only its own interests, not those of other CLECs.³³ No other CLECs were involved in the negotiations that culminated in that agreement.³⁴ Obviously there are differences among CLECs such that what will be acceptable to one CLEC will not necessarily be adequate for all CLECs. For example, PAETEC has implemented much more extensive back office automation than has Integra, which relies more on manual processes to complete various tasks that PAETEC has automated.³⁵ Integra's reliance on manual processes means that future changes to Qwest's OSS, should those changes degrade the functionality, access and robustness of the e-bonding capabilities, will not impact Integra to the degree that such changes could impact the automated processes used by PAETEC.³⁶

Requiring the merged company to retain the Owest OSS for an additional year beyond the two year commitment agreed to in the Staff Settlement will not unreasonably burden the merged First, CenturyLink asserts that, although it expects to realize cost savings by company. transitioning to a single OSS platform, such savings have not been included in any of the synergy projections.³⁷ Thus, adding a year to the OSS commitment should not interfere with the company's ability to meet its synergy targets. Further, CenturyLink asserts that it has made no plans regarding what changes it intends to make to Qwest's OSS or, indeed, whether there will be

any changes.³⁸ In fact, CenturyLink has repeatedly said that it is under no time pressure to do any OSS conversion and that any such conversion will take place only after a thorough deliberative process. ³⁹ There is, accordingly, no evidence that the merged company has any business need to replace the Qwest OSS within three years of the merger closing.

Although no other state commissions have yet required a three year commitment, the Washington, Oregon, and Minnesota commissions have yet to make a decision. In Minnesota, in particular, where commission deliberations were held on February 10, 2011, the commissioners voted to defer a decision, with the commission now scheduled to take the issue up again on March 3. In the course of the Minnesota commission's deliberations, it appeared that there was significant support on the part of several commissioners for additional conditions, including a commitment to not change Qwest OSS for at least three years after the merger and to require third party testing of any replacement OSS.⁴⁰

III. The Commission Should Condition Approval Of The Merger On The Merged Company's Commitment That Changes To Qwest OSS Will Not Degrade the Functionality Of CLEC Back Office Systems.

Condition 19 of the Staff Settlement provides that any changes to Qwest's OSS will provide a level of service quality that is not less than Qwest currently provides, with "functionally equivalent support, data, functionality, performance electronic flow through and electronic bonding." PAETEC is concerned that the references to "electronic flow through" and "electronic bonding" are too vague to provide an effectively enforceable commitment. In particular, PAETEC

³⁸ Transcript, Vol. 2, page 289, lines 11-17 (Hunsucker); see also Transcript, Vol. 2, page 310, lines 9-13, page 312, line 8-page 314, line 14; page 316, line19-page 317, line 4; page 324, line 18-page 325, line13; page 346, lines 15-19. (Hunsucker).

³⁹ See, e.g., Transcript, Vol. 1, page 44, line 23-page 45, line 1 (Glover) ("We are not trying to rush into this. The benefit is Qwest today is a stand-alone entity with stand-alone OSS, stand-alone retail billing systems. And so it is not like we have to be in a rush to convert systems and so forth.")

⁴⁰ See In the Matter of the Joint Petition for Approval of Indirect Transfer of Control of Qwest Operating Companies to Century Link, MPUC Docket No. P421, et. al/PA-10-456, Transcript of PUC Deliberations, February 10, 2011. See, e.g., page 91, line 22-page 93, line 12. A copy of the transcript of the deliberations of the Minnesota Commission is being filed with these Exceptions at Attachment B.

is concerned that the merged company might later urge a more narrow interpretation of this provision that would permit it to implement OSS changes that would reduce electronic flowthrough in the CLECs' back office systems. That is, without further clarification, one could interpret "flow through" to be limited to providing functionally equivalent "flow through" within the ILEC OSS itself, while ignoring an equally important function that the current Owest OSS enables information/data to flow through into a CLEC's back office system. In order to provide sufficient protection for CLECs like PAETEC that make extensive use of the e-bonding capabilities that are currently available through Qwest's OSS in order to automate the CLEC's back office systems, PAETEC asks that this condition be revised to make clear that any OSS changes must be "functionally equivalent" with respect to the functionality of CLEC back office systems.

Based upon testimony provided by Staff and the Joint Applicants, this amendment does not expand, but only clarifies, the merged company's obligations under Condition 19. examined at the hearing on this issue, Mr. Hunsucker, on behalf of the Joint Applicants, testified that, pursuant to the Staff Settlement Agreement, the Merged Company would "provide the same functionally equivalent support[,] data flow-through, et. cetera. So we will be required to provide functionally equivalent electronic flow-through."41 Similarly, Mr. Abinah, testifying for the staff that, "[F]untionally equivalent means the same at least, but if there is room for improvement, it should have the ability to do that after consolidation with the CLEC."42

No party has yet contended that CenturyLink could, consistent with the Staff Settlement Agreement, implement changes to Owest's OSS that have the effect of diminishing the flow through functionality directly into a CLECs' back office systems. Nor could such a change be seen as consistent with the public interest. The clarification proposed by PAETEC is, therefore, a modest one that does not change the substance of the Settlement Agreement but provides needed

clarity on issue that is particularly important to PAETEC as well as other CLECs that, like PAETEC, have made substantial investments necessary to automate their systems. This clarification also will help reduce future disputes over Condition No. 19.

IV. The Commission Should Condition Its Approval Of The Merger On Third Party Testing Of Any OSS Used By The Merged Company To Replace Qwest's Current OSS.

The record establishes the following facts: (1) CenturyLink will, if the proposed transaction is approved, inherit an exponentially larger wholesale operation than it has operated to date: 43 (2) CenturyLink intends to transition to a single OSS platform for both CenturyLink and Owest legacy companies in order to cut costs, 44 but has provided little detail regarding its OSS plans; 45 (3) CenturyLink's OSS does not offer CLECs the same level of functionality as Qwest's current OSS:46 (4) CenturyLink's OSS has not been third-party tested to determine whether it meets the requirements of Section 271 of the Act;⁴⁷ (5) the FCC has concluded that actual commercial usage is most probative evidence that OSS functions are operationally ready;⁴⁸ and (6) the FCC has favored the use of third-party testing to evaluate the adequacy of OSS systems in the absence of actual commercial usage.⁴⁹

Owest's OSS was subjected to an extensive third-party test conducted over a three-year period for the express purpose of determining whether Qwest's OSS satisfied the nondiscriminatory access requirement under Section 271 of Act. That third party testing revealed hundreds of problems that were addressed, and later resolved, through OSS improvements and re-

testing. Part of the third party testing involved load testing the OSS to make sure that the systems and supporting processes were capable of handling order volume spikes as well as the standard level of order volumes. The load testing exposed systems and processes that were overly manual that could cause CLEC orders to stack up and delay service or repairs. Countless person hours and significant investment by both Owest and CLECs went into this testing process to make sure the Owest OSS truly satisfied its obligation to provide nondiscriminatory access to systems and processes to ensure that competition would not be harmed by system and process failures that were under Owest's sole control. Ultimately, because of those investments and the continued review and oversight of state commissions like this one, Qwest ultimately received 271 authority to provide in-region interLATA services.

In contrast, CenturyLink's OSS has not been third-party tested, nor has it handled the actual commercial volumes it will experience in Owest's region. Replacing Owest's legacy OSS with CenturyLink's legacy (or new) OSS will likely lead to backsliding on Qwest's 271 obligations because there would be no assurance that Owest would be providing the nondiscriminatory access to OSS that was a quid pro quo for 271 approval. It is of little comfort to CLECs to be told that "if there is a problem, the dissatisfied CLEC can come before the Commission."50 Not only would having to bring a complaint to the Commission divert CLEC resources that would be better spent competing for and serving customers, there is little chance that a complaint before the Commission would produce a quick enough result to be an effective remedy for substantial OSS problems. Moreover, without testing data, there would be little or no objective data available to show whether the modified OSS was providing nondiscriminatory access to CLECs, and as complainant, the CLEC would have the burden of proving the modified system was not working. Indeed, as Commission Staff recognized, "the pace at which telecommunications technology is evolving and the industry is moving" makes it impossible to repair potential harm to competition, thus necessitating conditions that prevent such harm from

occurring in the first place.⁵¹ If CLECs are unable to efficiently use Owest's OSS to place orders for elements and services, competition in Arizona may be irreparably harmed before the Commission is able to resolve the problem, especially since it could take a lengthy period of time before the necessary OSS modifications can be developed and implemented.

CONCLUSION

PAETEC requests that the Commission condition its approval of the merger on the following additional or clarified commitments regarding OSS contained in Condition No. 19 of the Staff Settlement Agreement:

- (4) a commitment to maintain Owest's existing OSS for at least three years to match the Joint Applicants' 3-5 year synergy period;
- a commitment that any change in OSS will not adversely impact the operations of (5) CLECs' back office systems; and
- a commitment to, in connection with changes to Qwest OSS, conduct third party (6)testing to assure that specific components of wholesale OSS service quality. including support, data, billing, functionality, performance, electronic flow through and electronic bonding, are not degraded.

In order to implement these proposed conditions, PAETEC requests that the Commission amend the ROO's Findings of Fact, Paragraphs 152, 155, and 161, and add a related Ordering Paragraph beginning at page 57, line 23, in the manner set forth in the proposed amendments set forth in Attachment A.

RESPECTFULLY SUBMITTED this 24th day of February 2011.

"A"

Amendment 1

(3 Year Qwest OSS Moratorium)

REPLACE Finding of Fact No. 152 with:

"152. We agree with PAETEC and find that a three-year moratorium on OSS changes is appropriate. This moratorium is better aligned with CenturyLink's stated three to five year synergy period and will provide adequate protection for the companies in the competitive Arizona telecommunications market that are dependent of the Qwest OSS system."

Amendment 2

(Clarification of Condition No. 19 re Functionality)

REPLACE Finding of Fact No. 155 with:

"155. We agree with PAETEC's request to clarify the definition of "functionally equivalent" in Condition No. 19 to include the phrase "including functionality affecting the operations of CLEC back office functionality as of the closing date." This clarification will provide additional guidance to the parties regarding any proposed changes to Qwest's OSS and could reduce future disputes. Without this clarification, CenturyLink could adopt changes that adversely affect portions of the CLECs back office functions, which would provide CenturyLink with an improper competitive advantage."

Amendment 3

(Third Party Testing)

REPLACE Finding of Fact No. 161 with:

"161. We agree with PAETEC that Condition No. 19 should include third-party testing. CenturyLink has not provided any information in this record about which OSS it will ultimately use. The existing CenturyLink EASE OSS has not been subject to the large volumes of pre-ordering, ordering, provisioning, maintenance and repair and billing as the Qwest OSS has experienced. If CenturyLink chooses to use the EASE OSS (instead of the Qwest OSS), then third party testing is critical to ensure that EASE OSS can handle anticipated transactions from CLECs without interfering with CLEC operations or adversely affecting consumers who are dependent on such transactions to receive the full benefits of competition."

Amendment 4

(Ordering Paragraph)

At page 57, line 23, **INSERT:**

"IT IS FURTHER ORDERED that Condition No. 19 be modified as provided in Findings of Fact Nos. 152, 155 and 161, that a modified Condition No. 19 be submitted to Commission Staff for review and approval and that a revised list of Settlement Agreement conditions be docketed that includes the modified Condition No. 19."

CHAIR BOYD: Please. Who would you like to ask? COMMISSIONER WERGIN: Actually, I think I need all the parties. CHAIR BOYD: All right. Let me ask the parties to come forward. COMMISSIONER WERGIN: Do you want introductions before we do that or doesn't it matter? CHAIR BOYD: I suppose it wouldn't hurt if we run the line for introductions for efficiency sake. Ms. Masterton will start us out. MS. MASTERTON: Thank you, Mr. Chair. Susan Masterton, representing CenturyLink.

Page 7 Page 5 detailed plan with the regulators, I think that's 1 MR. TOPP: Jason Topp, from Owest. 1 2 MS. ANDERSON: Julia Anderson, for the 2 very reasonable, and C, allows coordinated testing 3 3 Minnesota Department of Commerce. with the CLECs. 4 MR. LIPSCHULTZ: Dan Lipschultz on behalf 4 Okay. Now, after reading that, then I 5 5 of the CLEC Coalition, participating as part of the want you to go to the CLECs' initial brief, all 6 Joint CLECs. 6 right? And if you look at the CLECs' initial brief 7 7 on page 66. And that also is the section entitled. MR. HALM: K.C. Halm on behalf of Charter 8 8 the Commission should utilize benchmarks to ensure Fiberlink, a member of the Joint CLECs. MR. MERZ: Good morning, Mr. Chair, 9 9 that the Qwest OSS is not degraded after the Commissioners. Greg Merz, representing Velocity 10 three-year period. And then if you go down just a 10 11 Telephone. 11 few lines, the line that begins, specifically the MR. BAILEY: Good morning. Tom Bailey, Commission. And it reads, Specifically the 12 12 representing Sprint and T-Mobile, also referred to Commission should order benchmarking for current 13 13 as the Joint Wireless Carriers. 14 14 Qwest OSS functionality related to support, data, 15 CHAIR BOYD: Good morning to all of you, 15 functionality, performance, electronic flow-through and electronic bonding. And then drop down, and it 16 thank you for being here again. 16 Commissioner Wergin. says establishing a benchmark in this way will 17 17 18 COMMISSIONER WERGIN: Good morning. 18 provide a set of specific verifiable criteria by 19 19 which future performance can be measured against Thank you. current performance standards. 20 I have been really struggling with this 20 issue. In this particular docket the ALJ has come And here's where I'm coming from. I'd 21 21 down very square and very clear, there are no ifs, 22 22 like to see -- or like to hear or see if we can come 23 ands or buts to the ALJ decision. In other words, 23 up with a resolution to this issue by looking there's nothing that says, well, this is okay, but specifically at the fact that the CLECs are 24 24 25 maybe this is okay, too, which we do have in some 25 requesting a detailed plan filed with the Page 6 Page 8 1 regulators, and C, allows for coordinated testing 1 dockets. Instead, the ALJ has been very clear in 2 with the CLECs. I'm leaving out B intentionally, 2 the decision that they made. 3 3 But some of the things that we talked vou can tell that. about in oral arguments raise some questions for me. 4 But then we also have some criteria in 4 5 And that's -- the biggest one, it seemed like one of 5 the CLECs' initial testimony. And so I'd like to the biggest points of contention was the OSS and the 6 hear from you if we can work with the two, the A and 6 7 7 third-party testing. It seemed like that was a big C, along with the specific benchmarking, and find 8 something short of third-party testing that would 8 deal with everyone at the table. 9 9 And so I went back to some of the -- in work for the parties. 10 Now, if everybody is totally confused and 10 an effort to solve that issue, I went back to some of the testimony, that being the direct testimony of 11 I have to clarify it, I'm in trouble, but that's the 11 12 Timothy Gates, if you have it, and the Joint CLEC 12 way I see it, unless I really missed something. initial brief to review this particular issue. 13 CHAIR BOYD: Mr. Topp. 13 MR. TOPP: Chair Boyd, Commissioner 14 And I noticed that in the Timothy Gates' 14 15 Wergin, it's our view that the Integra settlement testimony, it would be the question that begins --15 well, on page 123, the question that begins on line 16 does exactly that. If you look at the ALJ's 16 findings with respect to the Integra settlement 17 13, Do the CLEC conditions lock in CenturyLink to 17 18 using Qwest Legacy OSS forever? No. And then it 18 agreement --19 goes on to explain that the company has the 19 COMMISSIONER WERGIN: Could you point to opportunity to make changes so long as the merged 20 which issue that is, please? 20 MR. TOPP: It starts on -- it's quoted 21 company, A, files a detailed plan with the 21 regulators; B, conducts third-party testing; and C, 22 starting on page 33 of the staff briefing papers. 22 COMMISSIONER WERGIN: Do you have the --23 allows for coordinating testing with the CLECs. 23 It seems to me that we need to work with 24 24 okay. this issue and take a look at A, which says files a 25 MR. TOPP: Paragraph 110 --25

Page 9

COMMISSIONER WERGIN: Okay.

MR. TOPP: -- summarizes the commitments. It requires that we provide notice at least 270 days before replacing or integrating OSS. It says, Upon request, describe the system to replace -- or to be replaced or integrated, the surviving system, and the steps taken to ensure data integrity is maintained. It requires us to identify the plan contingency actions in the event of any significant problems with the plan transition. It requires us to provide CLECs the opportunity to comment on the merged company's plan in a form in which it is filed, as well as in the Owest change management process. It requires us to provide sufficient acceptance of the replacement interface by CLECs to help assure the replacement interface provides the level of wholesale service quality provided by Qwest prior to the closing date. Sufficient acceptance is determined by a majority vote of the CMP participants in testing. It requires us to work with the parties to develop acceptance criteria. It requires us to allow coordinated testing with CLECs, including a stable testing environment that mirrors production, jointly established test cases, and when applicable, controlled production testing unless

or other state commissions in order to have those concerns addressed.

Page 11

And, therefore, we would submit that the Integra settlement is a very thorough, a very difficult standard, that provides significant protections to CLECs to make sure that any transition to OSS will be an effective transition, which is in our interest as well as the CLECs' interest.

If we have an OSS that has problems, that's going to cause as many costs for us, either litigating before you, just from a business perspective in fixing the issues, in manually handling orders, in resolving disputes, it's going to cause significant problems for us just like it would for the CLECs, and so we have a strong interest in making any replacement work.

The additional layer of protection that is unique about this case, which wasn't necessarily the case in some of the other transactions that were raised in the evidence and put before the ALJ, is that at the time that this new system is being implemented, the -- the system that's being replaced will still be there, and so in a last-ditch situation it would be possible to continue to use

Page 10

otherwise agreed to by the parties. It requires us to allow testing associated with merger-related

system replacement or integration for the time periods in the CMP document or for 120 days, whichever is longer, unless otherwise mutually agreed to by the parties. And it requires us to provide the wholesale carriers with training and education on any wholesale OSS implemented by the merged company without charge to the wholesale carrier.

This was a heavily negotiated process with Integra. Integra is extremely active in — in the change management process, extremely interested in making sure that it is a sound process. The testimony of Mr. Gates was filed on behalf of Integra, as well as other parties. I think that the Integra settlement provides the type of notice that you're looking for. It provides for a flexible yet negotiated process that Qwest alone does not control for determining the criteria, whether those criteria have been met, and having plans for dealing with potential problems that may arise.

There is a notice time frame, which gives parties that have concerns about the processes being used the opportunity to come before this Commission

Page 12

that old system.

So, we think that there are a lot of protections in place, we think that this -- we think that the ALJ's recommendation reflects the extent of discussions about this issue, and that her judgment on this issue, which was very clear and very firm, should be affirmed because it's the right answer.

COMMISSIONER WERGIN: Okay. Mr. Chair, the joint intervenors, then, I don't need a repeat of the testimony, but -- and I do understand that the voting is a problem for you, I understand that you're feeling as though -- well, I'm going to put it very bluntly in language that I understand. You're sort of feeling as though if one CLEC is picked off, then the next one will be picked off. And I think they're a more savvy group that would probably stick together. But hearing that and hearing the degree to which the Integra settlement goes, other than that voting, I guess I'm uncertain, I'm not convinced that third-party testing is any better. And, again, I'm not -- I'm not asking for a complete rerun.

I think what I'm asking is, in addition to the Integra settlement, if you were going to do something other than third-party testing, what's

Page 13

missing? I'm missing it.

MR. LIPSCHULTZ: Mr. Chair, Commissioner Wergin, I'll skip some responses to Mr. Topp because I think you really want me to get right to your question.

And what Mr. Topp described for you just now was lots of process and lots of notice. It falls short on two things. It falls short on standards, criteria, what are they. And, secondly, it falls short on the sort of testing we believe you need to make sure that whatever standards you have are actually implemented appropriately and tested to make sure they work, namely third-party testing.

So your question, all right, put third-party testing aside. When we're talking about standards and criteria, what are we talking about and in what way is the Integra settlement deficient, at least minimally deficient. And I think if you look at what we filed at the end of the day yesterday, it was really in response, Commissioner Wergin, to your questions, because I think you were really trying to get at it. And number two in our list of three, I think, addresses the concern and the question that you're asking now.

The problem you have, and the ALJ

functionality, performance, flexibility, electronic flow-through, electronic bonding and access to underlying databases. That's really critical.

Because you want to make sure, I think from a public interest perspective, that any new OSS that comes down the pike can support not only one or two CLECs, but any other CLECs who might want to have a more e-bonded electronically-based flow-through process. That's an efficient process, that's good for the marketplace, it's good for the industry. There's at least one CLEC on the record, PAETEC, that has that

on the evidence in the record, would not.

So, the key here for us, when we're talking, as you read in our brief about benchmarking, what we want is to benchmark any testing, whether it's third-party or not, to a clear standard that says the new OSS is going to provide these functionalities at least at the same level as the current OSS. And anything short of that is very troubling because you could end up with a far inferior system, and at the very least you'll end up

kind of an interface with Qwest and the Qwest OSS

allows that to happen. The CenturyLink OSS, based

probably with a lot of litigation trying to figure out how much less it can be than it is today.

Page 14

actually identified it in paragraph 231 of her

report, is you have a standard in the Integra settlement that says service quality under the new OSS, whatever that happens to be, shall not be materially less. And the ALJ went on to say that that standard, materially less, will likely require resort to dispute resolution. And I'd add not only will it likely resort to dispute resolution and a lot of litigation, but the standard itself by its terms allows it to be less. And who knows what materially is. It puts CLECs in a very difficult position of trying to prove whether it's materially less or not.

And so what we are suggesting in what I filed yesterday, number two, is that we have a clear standard that says if you're going to have a new OSS, which we don't think is a good idea based on what we know about CenturyLink's systems, if you're going to do it, have a standard that clearly says the service quality under the new OSS has to be at least equal. Not less or materially less, at least at the same level with all the functionalities as it is today.

And to be clear, as we've set out here, make sure that includes the same or equivalent

Page 16

Page 15

So, you know, we would still say, Commissioner Wergin, that you need third-party testing to make sure that happens and that it happens objectively with an independent tester making sure that it does. But you've got to at least have that clear standard.

And I'll add, by the way, that what we've proposed here is nearly identical to language that the Joint Petitioners have already agreed to with the Arizona staff.

I hope that answers your question.
COMMISSIONER WERGIN: Mr. Chair.
Mr. Lipschultz, it goes a long way, but one of the things you said is a bit of a problem. You said you want something that all of the CLECs can agree to. It almost was like saying something everybody here can agree to and everybody that comes later can agree to all of the time, and that's a perfect world that doesn't exist, and so I want to base it in the reality of the world we live in.

And so what I'm looking for is some language that does what you're saying. And if it indeed is something that the Arizona staff put in, it shouldn't be too tough to get with the Joint Petitioners, figure out what that language is and

Page 17

put it in here so that we don't go to third-party testing.

MR. LIPSCHULTZ: Mr. Chair, Commissioner Wergin, I'm not looking for something that every CLEC in the country or in Minnesota would say yea to. What I'm looking for is a clear standard that makes sure what CLECs have today will be available tomorrow or the next day if and when the new company, CenturyLink, changes the OSS from what exists today. That's all I'm looking for.

And my point about the e-bonding and the electronic flow-through is that that is something that is available today under the Qwest OSS. It's a good thing not only for the CLECs that have it, but for the CLECs that might want to use it so that their operations can be more efficient, so that they can compete more effectively, and so that consumer prices can go down in an industry where everything is becoming more efficient. And so that's why that is so critical.

But, no, we're not looking for a vote by every CLEC on every specific functionality, we just want to keep what we have today in the face of a company that's purchasing Qwest and that doesn't have anything close to the same experience with of Joint CLECs that belief that the conditions should be more exhaustive, but the language that Mr. Lipschultz has referred to and that I have here is language that has been agreed to in a settlement agreement between staff and the Joint Petitioners.

CHAIR BOYD: At least where things stand today? It's not done?

MR. MERZ: The case is done, we're awaiting the ALJ's decision in that case.

CHAIR BOYD: Mr. Topp.

MR. TOPP: Yeah, I do not have the Arizona language in front of me, but I'll certainly be happy to take a look and try and decipher whether what Mr. Lipschultz is proposing is the same thing as was agreed to in Arizona or not. I'll simply have to take a look and get back to you.

CHAIR BOYD: That's fine, that's all I was trying to get to.

And with that, Commissioner Wergin, you're okay for now?

COMMISSIONER WERGIN: I'm okay, yeah. CHAIR BOYD: Commissioner Pugh.

COMMISSIONER PUGH: Thank you. If I could just follow up on that same line with one question for perhaps Mr. Lipschultz.

Page 18

wholesale operations or the levels of wholesale service orders or the same OSS functionalities, so on and so forth. That's really all we're looking for. The third-party testing we think is critical, but I understand the premise of your question and I wanted to be direct, and what's really important is that number 2 that I just referred to.

COMMISSIONER WERGIN: Thank you. Mr. Chair, I'm going to drop it there and let them have some time to think and let the other Commissioners ask the questions they have.

CHAIR BOYD: Did you -- I'm curious about this language staff has proposed in Arizona. Can you enlighten me a little bit on that? I know it's probably an in-process, in-motion matter, but --

MR. MERZ: Mr. Chair, actually, I represented clients in Arizona and have the language that was not proposed but agreed to in Arizona.

CHAIR BOYD: What I want to know is the status. Is this something being disputed as part of the Arizona proceeding? Is it something that's been agreed to?

MR. MERZ: It's agreed to between the Arizona staff and the Joint Petitioners. That case is still going on because, as here, there's a group

Page 20

Page 19

The ALJ seems pretty firm on her findings in 230, anyway, that the Integra agreement offers adequate protection. Could you spell out why in your opinion Integra shouldn't stand as a proxy for all CLECs? The strength for funding would be the condition that Integra is identical to all CLECs who may be affected by the OSS provisions. Could you let me know if there are, in fact, differences between some of your clients and Integra, which would then get at the -- kind of shake the foundation of the ALJ's finding?

MR. LIPSCHULTZ: Mr. Chair, Commissioner Pugh, several things. First of all, and I'll just start generally, Integra reached a settlement on OSS, among other things, and that settlement is based on Integra's judgment. Well, there are seven CLECs before you today who are saying they disagree with that one CLEC's judgment as to OSS. I think that counts for something and matters. We don't just litigate for the heck of it, it costs my clients a lot of money, they're here because this is important. And we've tried to narrow the issues, as you've noticed, throughout this process. We're here, seven CLECs, because we believe Integra's judgment was wrong on this or fell short of what

25

Secondly, when you reach a settlement, as Integra did, you make compromises. Not every CLEC has the same set of priorities and, in fact, Integra obviously had other business priorities that were a factor in its negotiations. For example, as you noted in the Integra settlement, the xDSL issue and the xDSL amendment was clearly a major issue as evidenced by the very detailed nature of that part of the settlement which included a very detailed interconnection agreement amendment.

I can tell you that only two of the seven CLECs here before you today find that xDSL amendment to be important, and I'll tell you that those two, which are my clients, don't find it to be as important as I believe Integra considers it to be. So you have one CLEC's judgment and you have that CLEC's judgment based on a set of its own internal business priorities that were obviously subject to negotiation with a lot of give and take.

The third thing, and I think the record shows this clearly, is that there are differences among CLECs as to OSS and, in particular, and the ALJ noted this, PAETEC has a very different and far -- let me put it this way, PAETEC is far more

a hammer, we got to this yesterday, don't assume there isn't a problem because others aren't here, but how many are there?

Page 23

Page 24

MR. LIPSCHULTZ: Mr. Chair, I mean, that's a really good question. And the short answer is I don't know how many other CLECs are out there. And I think Commissioner Pugh phrased his question as whether we can view or whether you can view Integra as a proxy for everybody, not only everybody here, but everybody out there. And I think a better proxy would be the seven CLECs who are before you, you only have those who are before you who are telling you what we need, a little something more.

And as I said, the CLECs I represent are not as concerned about that xDSL issue, I think the CLECs I'm representing are more focused perhaps than Integra, slightly so, on OSS. But, again, how many other CLECs are out there, I don't know.

But it brings me back to this electronic flow-through which I think is so important. However many CLECs are out there, in addition to the seven CLECs before you today, for all of them I would think from a public interest perspective it would be really important to make sure that that electronic flow-through functionality, where you have to

Page 22

electronically bonded to the current Qwest OSS than Integra is. And that has allowed PAETEC to automate its order processing and its repair processing far more than Integra. That has allowed PAETEC to operate more efficiently. And if the OSS system that comes down the pike doesn't have the additional protections to make sure that current functionality remains post-merger, PAETEC will lose that. And not only will PAETEC lose that, but other CLECs will lose the opportunity to have that.

Now, Integra, in its calculus, decided that maybe that wasn't important enough to insist upon at the end of the day, but for PAETEC and the other six CLECs before you today, it is.

I hope that answers your question. COMMISSIONER PUGH: It's helpful, thank

you. CHAIR BOYD: Let me follow that one more time. This kind of goes back to what I was asking yesterday about -- about kind of pleasing everyone, it goes to Commissioner Wergin's point. And it's an observation, it's not a criticism. But Integra is one CLEC, you're representing seven, how many others are behind the scenes and participate in CMP that are not speaking? And I'm not trying to use this as

download information from the Qwest system and then use it in your own to automate, I would think that from a public interest perspective that's very important. Very important to make sure that it's at least available not only to the CLECs here today, but to any new CLECs who come into the market tomorrow.

And so in answer to your question, I think the nature of the issue sort of defines its importance, because it's not just important to one CLEC, I think it's important to all CLECs.

CHAIR BOYD: Okay. And --COMMISSIONER REHA: Go ahead, finish. CHAIR BOYD: -- are you going somewhere

new?

COMMISSIONER REHA: Yeah. CHAIR BOYD: Okay. Mr. Topp. MR. TOPP: Thank you, Chair Boyd and Commissioners.

The concerns that Mr. Lipschultz raises on behalf of PAETEC are specifically discussed in the merger settlement agreement. As I read before, the standard, which we have said is not materially less, and I realize that there's some follow-up with respect to that, but it's then provided by Qwest

Page 25 prior to the closing date, including support, data, functionality, performance, electronic flow-through and electronic bonding. Those specific concerns that PAETEC has are a part of the explicit criteria that are to be looked at as a part of the process that has been negotiated with Integra. So I would suggest that the interests have been addressed in the Integra settlement agreement, despite the purported difference in interest. Which is also another point that I would

strongly dispute. This Commission has been involved in proceeding after proceeding over issues in which Integra and Qwest have had disputes related to the performance of Qwest's OSS system. They have a very strong interest in making sure that that's a robust and adequate system and the standards that they've set forth include the specific criteria that PAETEC is concerned about.

The -- as the ALJ notes in paragraph 230, pursuant to the agreement testing will continue until acceptance criteria are met and sufficient acceptance of a replacement will be determined by majority vote. So this is a standard in which CLECs will be actively participating and making decisions on pursuant to the Integra agreement.

testing and it would really have zero cost to the applicants.

Page 27

Page 28

Is that a correct understanding that I have?

MR. TOPP: Certainly the -- well, there are significant costs associated with maintaining, continuing to --

COMMISSIONER REHA: Right, but I'm talking about the cost of the third-party testing, which I asked about on Tuesday, which I went back through the record to try to find the issue related to costs, and from what I understand that 190 million, which would be the cost of the third-party testing, did not come out of this record, but came out to the Washington docket; is that correct?

MR. TOPP: That is correct.

COMMISSIONER REHA: Okay. And that 190 million is all the costs region-wide for third-party testing; is that also correct?

MR. TOPP: That is correct. One thing I'd point out is 70 million of that was the Arizona-specific OSS test. There was a region-wide test which was 120 million, there was a 70 --Arizona chose to have its own separate OSS test and that's a \$70 million test. And I think that, you

Page 26

And certainly while third-party testing, you know, to the extent that is being considered as a part of this, we discussed the costs yesterday. And, finally, the CenturyLink system is a system that is relied upon by a number of CLECs across a number of states, many of the same CLECs that operate here in Minnesota. And so the FCC has said that the most probative evidence is commercial volumes, and right now we know that there are significant volumes handled by the CenturyLink system. Two years from now that could be even more the case, we don't know sitting here today what that situation is.

CHAIR BOYD: All right. Let's move on. Commissioner Reha.

COMMISSIONER REHA: Yeah, I'm still on the same issue, Mr. Chair, but just not on that minute point. And I'm looking at the ultimate issues in the case, which is the impact on competition with respect to the OSS extension and third-party testing.

As I understand it, the OSS system is a UNE, that's correct. And it's my understanding also that if the Qwest OSS system is maintained, that it -- that it would -- we would not be requiring

know, these systems are, you know, they're not state-specific systems.

COMMISSIONER REHA: Sure.

MR. TOPP: And so while the testing that would be associated with this might not be identical, it does provide some guidance as the magnitude of the costs that are being addressed.

In my view, the issue with the third-party testing is -- to me, it's an effort to make any change so uneconomical that it would basically be almost an impossible economic decision for the company to make because of the unreasonableness of these costs and that's why we strongly oppose --

COMMISSIONER REHA: Sure.

MR. TOPP: -- this sort of condition. And if you think of it for the combined company as a whole, you know, in some states the CenturyLink system predominates, in others the Qwest system predominates. If you're going to go to one system, there's going to have to be, you know, there's going to have to be this sort of transition somewhere. And, you know, we honestly have not made a decision as to which is the best direction to go on that, but we do want the ability to make that sort of

Page 31 Page 29 1 decision, to do it in a responsible manner that's in 1 OSS systems currently, what I understand is that 2 the -- the primary difference between the Qwest OSS 2 the interests of everybody involved. 3 3 system and the CenturyLink OSS system is that COMMISSIONER REHA: And I'm looking at 4 not putting competitors, because of the merger, and 4 there's more electronic interface with the Qwest 5 this is a public policy issue, in a worse position 5 system and more manual interface and less electronic 6 6 interface with the CenturyLink system. Is that a than they would have been had the merger not 7 7 correct understanding, Mr. Topp? occurred. 8 8 MR. TOPP: That was a highly disputed Now, as I understand the OSS system, 9 there's a per transaction charge for the CLECs. How 9 item during the course of the proceeding. Our 10 do you -- it's paid on a per transaction charge 10 position is that the CenturyLink system is certainly basis. Are the CLECs -- when they want to interface capable of many of the functionalities of which the 11 11 12 with the OSS system, is it on a per transaction 12 CLECs are concerned about. CLECs haven't requested 13 13 those functionalities, Mr. Hunsucker testifies about charge? 14 MR. TOPP: Actually, the way that OSS 14 that, and so they haven't been turned up. And so, you know, as it has developed at this point, there 15 costs are generally recovered is as a part of the 15 TELRIC -- for UNEs is a part of the TELRIC pricing 16 may not be those functionalities, but that doesn't 16 mean that the system is not capable of doing them. scheme, and that is one of the components that is 17 17 COMMISSIONER REHA: Okay. And so that's 18 taken into account in developing those rates. 18 That's not based on actual costs, it's based on a 19 what you're talking about, why you've agreed to this 19 transition period of time in the Integra agreement, 20 hypothetical, forward-looking, most efficient OSS, 20 something that potentially could be impeded if a to kind of bring those functionalities to increase 21 21 22 condition is put in place that prevents us from 22 the electronic interface abilities of the 23 adopting that. 23 CenturyLink system if there are some significant 24 differences? 24 COMMISSIONER REHA: Okay. Now, the 25 MR. TOPP: I think that we've agreed to 25 Integra agreement, as discussed by the ALJ in Page 30 Page 32 finding 230, does require the CLECs to actively 1 this -- we don't know what the CenturyLink system 1 participate in trying to learn the new system and 2 will look like at the time of transition if that 2 participate in the changes that are going to be 3 indeed occurs. So, but regardless of what it looks 3 transitioned from the Qwest system to the like at that time, we see this settlement agreement 4 4 5 CenturyLink system. That's -- I mean, that's clear 5 as a responsible way to ensure that this transition can occur without -- you know, and making sure that 6 from the Integra agreement. 6 7 Would that offer, and maybe I should 7 it's robust and works well. 8 8 direct this to the CLECs, create significant costs One other point I would like to make 9 9 regarding CLEC impact is, I mean, there are costs to for the CLECs in terms of that transition from the 10 Qwest OSS system to the CenturyLink system? And 10 CLECs even associated with maintaining an existing OSS. There are -maybe that's a better question and you can respond, 11 11 but to start with the CLECs on that. 12 COMMISSIONER REHA: Sure. 12 13 MR. LIPSCHULTZ: Mr. Chair, Commissioner 13 MR. TOPP: There are constant updates and 14 Reha, yes, it would. Any transition to a new system 14 disputes about those updates and just training and efforts associated with that. And so, you know, is going to impose costs on CLECs as part of the 15 15 participation in that process, the testing by CLECs, 16 that's --16 so on and so forth. 17 COMMISSIONER REHA: And that's going to 17 18 COMMISSIONER REHA: Have there been any 18 be fairly expensive to do that, I would assume. 19 estimates in this proceeding as to what those types 19 MR. TOPP: Would be what? of costs would be for CLECs to do that transition? 20 COMMISSIONER REHA: Fairly expensive to 20 21 MR. LIPSCHULTZ: Mr. Chair, Commission 21 do that, for both the company and the CLECs. 22 MR. TOPP: Absolutely. Absolutely. 22 Reha, I'm not aware of any testimony in that regard COMMISSIONER REHA: Okay. And, I mean, I 23 on this record. 23 was around way back in 2001 when we would go to ROC 24 COMMISSIONER REHA: Okay. And I also 24 understand from the record, when you look at the two 25 and there would be this testing process that went 25

Page 33 on, and it was quite lengthy and it was quite 1 costs of those ups and downs during that 1 2 2 expensive, it was also quite -- there was a lot of self-testing, if you will? The bumps along the road 3 ups and downs in that process, let's put it that 3 with the volumes and so forth, who bears the risk way. And it really was quite complex. 4 and who bears the risk of those costs, is a question 4 5 And I'm just curious, we've come a long 5 that I have. 6 6 way since then, and you've got a system that's up MR. AHERN: Well, the company will bear 7 and going now, as you say, in other states. But I'm 7 the costs of any changes in the OSS -- the ongoing 8 just wondering whether that -- if we ordered 8 maintenance and upkeep and change through the change 9 independent third-party testing, it would seem to me 9 management is going to be the company's that we've learned a lot over the ten years or so 10 responsibility, and should there be some decision 10 that we've done testing of OSS systems, and I'm just 11 going forward about a new system or a transition to 11 wondering whether the third-party testing would be 12 a system, that will be the company's responsibility. 12 more streamlined, more efficient than it was back in 13 COMMISSIONER REHA: Okay. All right, 13 14 2000, 2001. You know, I'm concerned about the cost 14 thank you. 15 15 issue again. CHAIR BOYD: Mr. Lipschultz. 16 MR. LIPSCHULTZ: Mr. Chair, I just wanted 16 MR. TOPP: Theoretically, that could be 17 17 the case, but the answer is we don't know. to respond. First of all, there were commercial 18 COMMISSIONER REHA: Okay. 18 MR. TOPP: And it's our position that volumes back in 2001, competition didn't just start 19 19 it's better to have the businesses that are actually 20 and CLECs didn't just enter the market in 2000, 20 2001. Remember, the Act was passed in 1996, and I 21 going to be using the systems making the decisions 21 regarding the appropriate criteria and how to 22 recall a number of CLECs, when I was representing 22 the Commission and the AG's office, who were already 23 measure them as opposed to an outside third-party. 23 COMMISSIONER REHA: Okay. And so it's an 24 in business in 1997, '98, '99. 24 Second thing, and this is more important. 25 25 issue of whether we have -- who does the testing, Page 34 really, as we transition from one OSS system to 1 The FCC uses the term actual commercial volumes. 1 2 2 It's not just whether you have commercial volumes or another --3 don't have them, the question for OSS is whether you 3 MR. TOPP: Yes. can actually have -- whether you match the OSS to 4 COMMISSIONER REHA: -- and who bears the 4 5 cost of that? 5 actual commercial volumes, they're going to have to 6 be met by that OSS system. And as the ALJ found, 6 MR. TOPP: That's a critical issue from 7 7 the difference between these two wholesale systems, our perspective. 8 8 COMMISSIONER REHA: Okay. Thank you, as far as order volumes are concerned, is 9 exponential. And that was an ALJ finding. The 9 Mr. Chair. 10 Owest wholesale operations and wholesale volumes are 10 MR. AHERN: Mr. Chair. exponentially larger than CenturyLink, so there CHAIR BOYD: Mr. Ahern. 11 11 12 isn't a match between these two as to actual 12 MR. AHERN: Commissioner Reha, and I 13 believe, to go back to 2001 and why third-party 13 commercial volumes, which is really why we believe 14 testing was -- was the solution then, was because 14 third-party testing is important. there were no commercial volumes by which to figure And then I'll come back just to conclude 15 15 out how the system's going to work. 16 quickly to Commissioner Wergin's question that a key 16 for all of this, including the testing, is having The FCC has been very clear that the 17 17 the right standard. I just heard Mr. Topp refer 18 preferable method of dealing with systems going 18 19 forward is, if you've got commercial volumes, that 19 earlier in some of his responses to your questions about criteria to be looked at, and after he listed 20 is the best test if the system's going to work. 20 all these criteria discussed in the Integra 21 Rather than going back to hiring somebody else who's 21 going to make recommendations and then go back to 22 settlement. Well, we want a standard, a clear 22 standard and the right standard from which those 23 dealing with the folks who are actually going to 23 criteria flow, which was the point of the number 2 24 have to implement it. 24

in our filing last night. And then on top of that,

Page 35

Page 36

25

COMMISSIONER REHA: And who bears the

we think it's essential that you have third-party testing to make sure that you are testing because you don't have actual commercial volumes, just make sure that you're going to have a system that is verified by a third-party as adequate to support the volumes that are actually in play in the OSS -- in the Qwest markets as opposed to the CenturyLink.

CHAIR BOYD: Commissioner Wergin.

COMMISSIONER WERGIN: Mr. Chair, a question for staff. I'm actually really interested in the question that you asked, how many CLECs are not -- well, how many CLECs are there in total, maybe that's a better way to put it, in Minnesota. An approximate will do.

MR. FOURNIER: Mr. Chair, Commissioner Wergin, I would say somewhere between one and two hundred, closer to one hundred. I may be overstating it, but I think somewhere in that vicinity.

COMMISSIONER WERGIN: So we probably have one hundred that are not at the table.

MR. FOURNIER: Mr. Chair, Commissioner Wergin, I think there are a significant number that are not at the table.

COMMISSIONER WERGIN: Thank you.

from availability from Qwest or other wireline providers. So that is a significant benefit to the state, those are investments that, as the ALJ found, would not otherwise be made and therefore that's a very significant component of this.

CHAIR BOYD: So the investment pattern that was alluded to on Tuesday, the DOC agreement obligates the Joint Petitioners to spend on top of those previous obligations, but it's also targeted a little differently in terms of unserved and underserved?

MR. TOPP: The AFOR obligation is not tied to a dollar amount. It requires investments for a variety of purposes. And one of the things that was discussed at the hearing was how the marketplace has -- you know, how those investment objectives change over time. You know, back in 2000 it was getting DSL out to where it could be gotten to efficiently.

There has been a lot of investment in the last few years to increase speeds to those customers that already have DSL available to them. And, in particular, a fiber to the node buildout has been our strategy, is to build fiber to, you know, sort of to the neighborhood but not to the actual houses.

Page 38

CHAIR BOYD: Other questions? I have one for, I guess for Mr. Topp. There was a section of the ALJ report around paragraph 317 where there was additional testimony offered by Mr. Stanoch in response to the question -- really the question from Commissioner O'Brien was on Tuesday, about the relationship between the DOC settlement and extra investment relative to the AFOR plan. And I wondered if you would expand, take a minute and tell me how the obligations of the AFOR plan for infrastructure development relate to the agreement with the Department of Commerce?

MR. TOPP: The obligations in the AFOR plan will continue to exist and are unaffected by the obligations with respect to the Department of Commerce settlement.

And I think significant components of that settlement are, you know, the total number, which is directed towards increasing broadband availability at broadband speeds, and then a third of that amount, which is designated towards providing broadband to unserved or underserved areas. If you look at statistics -- and that's measured not just by availability from Qwest, that's Page 40

Page 39

And so those historical investments certainly are consistent with the AFOR's obligations and the goals of the AFOR's obligations, but, you know, the marketplace and the demand of consumers will continue to evolve, but a lot of that fiber to the node buildout has already been completed.

CHAIR BOYD: So that one ought not -- the broadband buildout is a component of the AFOR obligation, but at any point in any year in the AFOR Qwest could have invested zero in broadband development and put the money into other areas of technology?

MR. TOPP: I think that's one of the -broadband development is one of the -- the goals, and so I wouldn't say that zero is --

CHAIR BOYD: Theoretically.

MR. TOPP: -- consistent with it. And, you know, I think what it does, the AFOR does is gives the company the flexibility to make responsible investments to improve service quality and enhance product availability for Minnesota customers. And I think that that's an approach that has worked really well.

CHAIR BOYD: So it would be best to say that the Department's agreement obligates Qwest to

Page 41

spend more than they were obligated to spend in the AFOR and it does target a certain number of dollars into broadband?

MR. TOPP: I would say that it targets a certain number into broadband and it targets a certain percentage of that to unserved and underserved customers.

CHAIR BOYD: Commissioner O'Brien.

COMMISSIONER O'BRIEN: Mr. Topp, a wise person once observed that you have to make sure you get the emphasis on the right syllable. A predicate that I asked Mr. Ahern was whether he would agree that looking to the immediate future is a decent way to predict -- or, excuse me, immediate past is a good way to predict the immediate future. And I think most people would say, yeah, that's at least one way to look at it.

And then we establish as a matter of fact, Mr. Ahern agreed, that 50 million over five years is \$10 million a year, and that enhancement was a reduction. That's still not a -- that isn't a question of emphasis or misunderstanding. You can certainly say, and I get that argument, that, well, but there's no assurance that what we were doing in the immediate past would be what we were doing in

So in no way does this mean that necessarily there's

Page 43

Page 44

going to be a reduction, there's going to be

business obligations, significant pressures to make
 right investments for dealing with the economy, you

know, for the marketplace that evolves. Broadband customers are the lifeblood and the key to survival of any wireline company. And so that, you know,

should be kept in mind as well. So to suggest that this would result in a reduction in investment is simply wrong.

simply wrong.

CHAIR BOYD: All right. New topics?

Commissioner O'Brien.

13 COMMISSIONER O'BRIEN: I'm ready to begin deliberation, if the Commission is.

15 CHAIR BOYD: All right. We'll see if 16 your colleagues are equally ready.

COMMISSIONER WERGIN: Mr. Chair -- I'm sorry.

CHAIR BOYD: Commissioner Wergin.
COMMISSIONER O'BRIEN: May I begin?
CHAIR BOYD: Are you asking a question or are you deliberating? We haven't moved to deliberation yet.

COMMISSIONER O'BRIEN: Oh. CHAIR BOYD: Commissioner Wergin.

Page 42

the future and that we are committing to this, or we could have done nothing, is an enhancement. Good, that's a -- that's an emphasis on the right syllable, but in terms of fact, 10 million is less than what you were doing. Mr. Ahern agreed with that.

Are you now withdrawing that?

MR. TOPP: I guess I would respond in this fashion. The -- what this does is, in a changing environment assures that a certain amount is going to be invested in broadband. As to whether the past can predict the future, I would agree that that's one way to look at it, but you also have to look at the actual marketplace and what has taken place. And the record in this case establishes that the expense associated with buildout on fiber to the node has been largely completed, and that's something that Mr. Stanoch testified to before the ALJ.

CHAIR BOYD: All right. Other questions on this topic, or new topics?

MR. TOPP: If I may?

CHAIR BOYD: Mr. Topp.

MR. TOPP: I mean, one other thing I do want to emphasize is this is a minimum commitment.

COMMISSIONER WERGIN: I'm asking a question.

Mr. Chair, the only question I have is whether there is any interest, and there is on my part, in having the petitioners and the intervenors take a look at the particular language they were talking about associated with Arizona, if that's amenable to all the parties. That's the only thing I have.

CHAIR BOYD: All right.

COMMISSIONER WERGIN: And going to deliberation is okay as long as we allow that to be part of it.

CHAIR BOYD: You probably ought to finish that topic before we move on.

Commissioner Pugh.

COMMISSIONER PUGH: Mr. Chair, I had the same thought in mind, that perhaps we could get resolution of that. And I was thinking before we start deliberations, maybe take a short break and let Mr. Topp contact Arizona counsel, or whoever it takes to do that. Though we could do it on the run if you want to do that as well.

CHAIR BOYD: Well, I think it would be cleaner to have this issue addressed and settled

Page 47 Page 45 before we move to the deliberation. 1 1 similar language to what we've seen in Arizona has 2 2 also been adopted by the staff of the Oregon PUC and COMMISSIONER PUGH: That would be the 3 the Washington UTC. So the language which the Joint 3 only kind of question mark before we'd get started, 4 Petitioners have agreed to in those three states and 4 in my mind. 5 5 possibly others is in play today and ought to be CHAIR BOYD: All right. Let's take 15 6 minutes. If that's not enough, we'll take a little 6 adopted by this Commission because Minnesota should 7 7 not have a standard less than other states. more. But let's aim for 15 minutes. 8 8 MR. MERZ: And, Mr. Chair, just on that (Break taken.) 9 CHAIR BOYD: All right. Let's come back 9 point, unlike the other CLECs at the table, Velocity 10 10 only does business in Minnesota, so it's not as if to order. we could get enforcement of the Arizona language in 11 What did you all do for 45 minutes? 11 Arizona, we could only come to this Commission. 12 12 Mr. Topp. That's why we believe the standard that the Joint MR. TOPP: We did have some discussions. 13 13 14 we didn't reach resolution. I think that the offer 14 Petitioners have agreed to, not less than, ought to 15 be the standard in Minnesota as well as it is in 15 that we are willing to make is there is an opening paragraph that we agreed to in Arizona that contains 16 Arizona. 16 17 17 language that we think addresses the standard issue CHAIR BOYD: Mr. Topp, to the extent that that has been there and that Mr. Lipschultz offered 18 there have been agreements -- and I won't assume 18 19 as a model for the language that they had submitted 19 that there have been agreements, I'm not aware of the proceedings in the other states -- but if there 20 last night. And so if the Commission were to not 20 21 were agreements in other states what would be the order third-party OSS testing and included this 21 position to adopting the same language in Minnesota? 22 clause verbatim in its order, that is something that 22 MR. TOPP: Well, that is what we have 23 we would agree to. And I can pass -- I'm sorry for 23 the scratchings on here, but I can pass out that 24 24 offered right here. This language is the language 25 language so that you have it. 25 that we agreed to. Page 46 Page 48 1 CHAIR BOYD: This paragraph? 1 CHAIR BOYD: All right. Thank you. 2 MR. TOPP: In Arizona, yes. 2 Mr. Lipschultz, anything to add? Or 3 CHAIR BOYD: But the implication is 3 others among you? 4 4 MR. LIPSCHULTZ: Mr. Chair, we're not there's more --5 looking at -- we don't view this standard language 5 MR. TOPP: I think what Mr. Lipschultz is 6 6 as mutually exclusive with respect to third-party suggesting is that there be modification to the 7 testing. So putting third-party testing aside for a 7 Arizona language to include a reference to 8 underlying databases. And this is heavily 8 moment, we'd be willing to go with the Arizona 9 9 negotiated language with puts and takes in both language with one addition to it, which we have in our proposal, which my clients believe is very 10 directions, and determining whether that's a 10 significant addition or not is something that, you important. And that is access to underlying 11 11 12 know, in this sort of immediate time frame I don't 12 databases, because we think that's a critical and 13 think we could do. I think it would take a long 13 actually an essential component to having the same 14 level of e-bonding and flow-through that you have 14 time and would create the same sorts of today under the Qwest OSS. That access to 15 15 inconsistencies, potentially, that have been underlying databases is what makes electronic 16 expressed ---16 flow-through work, and to nail that down precisely 17 CHAIR BOYD: But this is in play in 17 we believe is very important. 18 18 Arizona, Washington and Oregon, this exact --19 With that addition to the Arizona 19 MR. TOPP: I have not gone to look at --20 language, we would be fine and believe that that CHAIR BOYD: As best we know? 20 21 would provide an appropriate standard and certainly 21 MR. TOPP: I haven't gone to look at a vast improvement over the Integra settlement. 22 Oregon and Washington agreements to see if there are 22 some minor language differences. I do know that 23 MR. HALM: Mr. Chair, if I could? 23 this language is agreed to and that was the language 24 CHAIR BOYD: Mr. Halm. 24

that Mr. Lipschultz identified, so that's what I

MR. HALM: I'd just like to add that

25

Page 51 Page 49 1 the approximate dollar amount of this transaction? 1 focused on during this time frame. 2 Just refresh my memory on that. 2 CHAIR BOYD: Commissioner Pugh. MR. TOPP: I don't have that figure, I 3 3 COMMISSIONER PUGH: Thank you, Mr. Chair. 4 4 know it's in the tens of billions. One thing I guess that concerns me a bit is does 5 anyone know the timing of the final hearings in 5 COMMISSIONER O'BRIEN: Tens of billions? 6 MR. TOPP: Yep. 6 Washington, Oregon and Arizona? Is that scheduled CHAIR BOYD: Other questions about this 7 7 at this point? 8 8 MR. MERZ: Well, we're expecting the language? 9 ALJ's report in Arizona -- I was not involved in 9 Okay. Commissioner Reha, I know you had 10 either Oregon or Washington -- we're expecting the 10 one other issue. COMMISSIONER REHA: I just had a 11 ALJ's report in Arizona, I believe it's within a 11 clarifying question, and it's similar to what we've 12 week or two. They have a similar process to our 12 13 just been referring to, and that is on issue 1. 13 own, in that there will be an opportunity for parties to take exceptions and the Commission will 14 And I just wanted a clarification whether 14 the provisions contained in each of the five hear it. I don't know that it's realistic to think 15 15 settlement agreements will be made to all CLECs or 16 that the Arizona proceeding will be finished any 16 wholesale customers? And the reason I'm asking for time before, you know, the end of March, but that's 17 17 a clarification is I recall the other day, I can't 18 kind of the general time frame that I think is in 18 recall if it was you, Mr. Topp, or one of the other 19 play in Arizona. 19 20 counsel, said that it would be made available to 20 MR. HALM: And Mr. Chair and Commissioner 21 Pugh, in Oregon and Washington it's generally the 21 similarly situated CLECs, and I didn't know what same time frame that we just heard about in Arizona. 22 that meant. And I was wondering if you could 22 23 The parties have submitted their briefs and they're 23 clarify that for me. 24 MR. TOPP: Yeah. By similarly situated 24 now waiting for ALJ reports in both jurisdictions. 25 we mean that, you know, CLECs that are in the same 25 And I believe the same process will then play out Page 50 Page 52 1 position, you know, whether it be contract-wise or 1 after that, the full Commission will review the ALJ 2 whatever else. But essentially the idea is that if 2 report and make their decision. So I think 3 the CLEC, you know, if it's appropriate for that 3 generally the same timeline you just heard for CLEC to, you know, if it's -- if it's applicable and 4 Arizona will apply in Oregon and Washington as well. 4 5 CHAIR BOYD: Mr. Topp. 5 they're in the same position as the company we initially entered into the agreement with we would 6 MR. TOPP: Mr. Chair, Commissioners, 6 7 7 make this available to them. there is an important distinction between Arizona, 8 COMMISSIONER REHA: Okay. Would you have 8 Oregon and Washington as opposed to Minnesota. And 9 an objection to putting -- or adding a provision in 9 that is the ALJ report becomes the order of the 10 Commission option 1 stating that the provisions 10 Commission without the step that we are going contained in each of these settlement agreements 11 11 through today. And so when that order comes out, 12 that'll be the step equivalent to the order that you 12 will be made to all wholesale customers, which is 13 issue after we're done with this hearing. 13 very similar to what you have in that wholesale And so our read is we expect, you know, 14 operations provision that we just finished speaking 14 an ALJ recommendation in Arizona in mid-February and 15 15 16 MR. TOPP: We would want that similarly 16 then a Commission decision in early March. In 17 situated language to be included. If the customer 17 Oregon, post hearing briefs are filed January 25th 18 and February 1st, and an order is expected within 30 18 has a contract that they have signed and agreed to 19 days of that February 1st date. And in Washington, 19 that is inconsistent with, you know, what this order might direct, we would consider that CLEC to be in a 20 20 post hearing briefs are filed January 21st and all 21 different situation than those with which the 21 parties requested an order before the end of 22 22 February. agreement --23 23 COMMISSIONER REHA: Can you give me an CHAIR BOYD: Thank you. 24 example of a situation like what would occur there? 24 Commissioner O'Brien. 25 I'm still struggling to understand when a wholesale 25 COMMISSIONER O'BRIEN: Mr. Topp, what is

Page 55 Page 53 1 customer, a CLEC, would not be similarly situated 1 understanding, certainly Integra's understanding and 2 here in Minnesota. 2 the other party as well in the settlement, that it 3 MR. TOPP: If a customer has entered into 3 would be available to all wholesale customers. 4 a new commercial agreement --4 COMMISSIONER REHA: Any response? 5 5 COMMISSIONER REHA: Yeah. CHAIR BOYD: Mr. Topp. MR. TOPP: The terms of the agreements, 6 6 MR. TOPP: -- and has signed and agreed 7 each talk about availability, and we certainly are to that, but the agreement contemplates a situation 7 going to abide by those terms of those agreements. 8 where that customer has not signed a new commercial 8 9 agreement, that would be a situation where we would 9 And generally that does mean that we'll make them available to other customers. And there's language 10 consider there to be a difference. 10 COMMISSIONER REHA: Okay. I guess I will in the Integra agreement that Mr. Lipschultz just 11 11 ask -- if I might, Mr. Chair? 12 referred to and we would agree to that. As to the 12 specifics as to availability of CLEC terms to 13 CHAIR BOYD: Please. 13 COMMISSIONER REHA: Ask the CLECs to nonCLECs, such as wireless carriers, I can't comment 14 14 15 on that. I would have to rely on the agreements of 15 respond to that. the settlements themselves because it's by no means 16 16 CHAIR BOYD: Mr. Bailey. clear that, you know, a specific agreement with a 17 MR. BAILEY: I was just going to say, my 17 18 understanding was that -- what I had understood was 18 CLEC would necessarily be correct with respect to a wireless carrier. I simply don't know one way or that wholesale customers, these settlement 19 19 the other what the ramifications of that are. But agreements would apply to wholesale customers in the 20 20 21 same position, I specifically understood that all 21 we -- this is carefully negotiated language that we the ICA provisions would apply to wireless carriers would abide by in making these terms available to 22 22 23 who, by definition, are not CLECs, and my 23 others. MR. BAILEY: Can I ask for a understanding, I thought, from the presentation, was 24 24 2.5 that Joint Petitioners understood that all the ICA 25 clarification? Page 54 Page 56 1 CHAIR BOYD: Mr. Bailey. 1 provisions would apply to my clients. 2 MR. BAILEY: Mr. Topp, do you have the --2 COMMISSIONER REHA: Wholesale customers. 3 your filing of the settlement agreement with Integra 3 MR. BAILEY: Right. in front of you? I just want to ask for some 4 COMMISSIONER REHA: Generically. 4 5 MR. BAILEY: Right. Or you could say 5 language, because I'm not sure -- I thought you were 6 telecommunication carriers. I like also customers. 6 saying that paragraph 15 on 11 meant that this 7 7 agreement would apply to all carriers with respect And, again, I don't -- this is a shift. I guess 8 to the ICA terms, and then I just heard you say, oh, 8 staff -- I'm wondering if staff is surprised by this 9 but if there's an ICA with a CLEC, that doesn't 9 as well. 10 apply, it might not apply at all to a wireless 10 MR. LIPSCHULTZ: Mr. Chair, Commissioner carrier. So I'm referring to page 11, paragraph 15. Reha, I'm looking at page 11, paragraph 15 of the 11 11 After fully executed, filed with and, where 12 Integra settlement, which says after a fully 12 13 necessary, approved by a commission, this agreement 13 executed, filed and, where necessary, approved by a 14 Commission, this agreement -- and they're referring 14 will be made available to any requesting carrier, joint -- a wireless carrier, anybody who is looking 15 to their settlement agreement -- will be made 15 for interconnection is a requesting carrier. And available to any requesting carrier. I mean, I 16 16 think the intent, as I understood it, is that those 17 then you talk about if there is some sort of 17 18 agreements would be available to all, any and all 18 amendment to the settlement or some amendment of the 19 19 ICA in question, that that would also be provided to wholesale customers. 20 20 other carriers in the state upon request. Now, if by its terms it wouldn't apply to I think this language is clear and I have 21 a CLEC, a particular CLEC, then of course it just 21 22 no quibbling with it. What I'm trying to understand 22 wouldn't apply. But you have certain provisions and is what I think is some limitation about similarly 23 conditions, commitments, in all these settlements 23 situated carriers somehow having --24 that if by their terms they apply to a wholesale 24 customer, then I would think, and it was our 25 CHAIR BOYD: Mr. Topp. 25

Page 57 Page 59 Mr. Topp a question for clarification? 1 MR. TOPP: We'll abide by the language in 1 2 the Integra settlement, if that's a concern. I 2 CHAIR BOYD: Please. 3 MR. FOURNIER: Would somebody's wholesale 3 mean, I didn't negotiate this specific language and this wasn't a nuance that I had focused on in or commercial agreement that expired after the date 4 4 connection with this. So, you know, I would defer 5 of the merger announcement up until whenever, would 5 the language, if the language is clear, as 6 they be precluded from opting into this agreement 6 Mr. Bailey suggests, and I don't think he should 7 because they are not defined as similarly situated? 7 8 MR. TOPP: Well, the TW Telecom 8 have a concern, but I simply can't take a position 9 one way or another on that sitting here today. 9 situation, in particular, addresses a situation 10 10 MR. BAILEY: Well, that's not where there was at least the potential that a wholesale agreement could expire. And the entire particularly reassuring, if the company that's 11 11 purpose of that agreement is to protect against -agreeing to the language doesn't think it's clear, 12 12 clear enough to even talk to this Commission about. or to prevent that event from -- from causing the 13 13 But I guess I don't understand the reservation 14 problems that they were concerned about in the 14 proceeding, and that's why TW Telecom has settled. that's being put into the record here, so... And 15 15 whether my client should be concerned, because for If there are other CLECs in the same situation, we 16 16 would certainly abide by that, that agreement as some reason it's not clear to Owest that my clients, 17 17 18 who are wireless carriers, are covered by this 18 well for them. provision. If they can't say that on the record 19 MR. FOURNIER: What if they sign another 19 20 commercial agreement on July 1st of 2010, would they now, then that's a concern, 20 21 CHAIR BOYD: Mr. Topp, is Sprint a 21 be precluded from them opting in even if the terms were adverse to them and the terms of this agreement 22 carrier? 22 23 MS. MASTERTON: Mr. Chairman, I mean, if 23 would have been better? I could just jump in. I think maybe we got off on MR. TOPP: My understanding of the 24 24 the wrong track here. I mean, I think it was 25 TW Telecom agreement is that in that situation we 25 Page 60 Page 58 1 generally the Joint Petitioners' understanding that 1 would not be going back and changing the new these agreements would be available to other 2 contracts that CLECs have already -- or whoever the 2 party is, have already agreed to. 3 3 wholesale carriers. MR. FOURNIER: Thank you, Mr. Topp. 4 COMMISSIONER REHA: Okay. So we could 4 5 put a provision in issue number 1 that would say 5 CHAIR BOYD: All right. Further that the provisions contained in each of these five 6 6 questions? 7 7 settlement agreements shall be made available to all Commissioner Pugh. 8 8 COMMISSIONER PUGH: I just have one wholesale carriers? follow-up back on the language that was -- if you 9 MS. MASTERTON: Mr. Chairman, 9 read the last few phrases of this paragraph, the Commissioner, I just want to make sure you 10 10 understood that the CWA agreement probably doesn't last sentence says that the merged company won't 11 11 12 apply to wholesale carriers, so when you say all 12 replace or integrate the Qwest systems without first establishing a detailed transition plan and 13 five agreements, I think the CWA probably is an 13 complying with the following procedures, colon. 14 14 exception to that. 15 Blank? Is that the agreement? 15 COMMISSIONER REHA: All right. So I'm just trying to find some language that will capture MR. TOPP: The remaining -- the remaining 16 16 that as an assurance to the -- all the parties to provisions in that settlement agreement largely 17 17 18 this proceeding. 18 track the Integra settlement, I don't know that 19 MS. MASTERTON: I mean, I would just say 19 they're identical, but the concept is that this that the wholesale settlement agreements, I think would be something that would, you know, apply on 20 20 top of the provisions in the Integra settlement. that would probably cover it. 21 21 22 COMMISSIONER REHA: The wholesale 22 COMMISSIONER PUGH: Thank you. settlement agreements. Okay, thank you. CHAIR BOYD: So to incorporate this would 23 23 we put a period after the word plan or would you 24 CHAIR BOYD: Mr. Fournier. 24 MR. FOURNIER: Mr. Chair, if I could ask 25 propose a phrase that comes back to incorporating 25

Page 63 Page 61 adhered to, so that modification makes sense to me. 1 1 the terms of the other settlements? 2 CHAIR BOYD: Mr. Topp. 2 MR. TOPP: I guess you could say 3 MR. TOPP: I would suggest that the 3 complying with the procedures set forth in the Integra settlement agreement. 4 modification really makes no change to the meaning 4 5 5 CHAIR BOYD: One more. Where is this of the sentence. The sentence says the standard, I 6 going to go inside our whole process? Where was 6 think if you put it in, it does no harm, but I don't 7 think it adds anything either. Because it says 7 this proposed to be inserted? 8 provide a level of wholesale service quality that is COMMISSIONER WERGIN: Mr. Chair. 8 9 CHAIR BOYD: Commissioner Wergin. 9 not less than that provided by Qwest prior to the 10 closing date with functionally equivalent support, 10 COMMISSIONER WERGIN: Mr. Chair, my understanding is it fits in with issue number 4. 11 data, functionality, performance, you know, 11 12 et cetera. And so if that added clause is not 12 Essentially -- essentially, if we're going to incorporate this, you would use number 2, saying 13 intended to change the meaning, I mean, that's 13 notwithstanding the determinations above, and then 14 exactly what we intend to do, and we don't have 14 15 objection to it. I would be more comfortable if we incorporate this language instead of what is in our 15 kept the language identical to eliminate any briefing paper. Is that correct? 16 16 17 potential for confusion. 17 CHAIR BOYD: Mr. Topp, Mr. Lipschultz? CHAIR BOYD: Commissioner O'Brien. 18 MR. TOPP: I think that that is accurate. 18 Or you could do option 1, make no modification --19 COMMISSIONER O'BRIEN: How about putting 19 20 well, you are modifying the ALJ's report, so I guess a period after the word systems? You truly have 20 21 something in mind, you're going to make change. And vou could do --21 you can't say, hey, your language doesn't do CHAIR BOYD: 3. 22 22 MR. TOPP: Yeah, do 3, take other action. 23 anything, we still want the right to make changes, 23 and I say, well, then, let's make sure whatever That probably makes sense. 24 24 25 changes meet the standards. Well, we don't need 25 CHAIR BOYD: I'm sorry, Commissioner Page 62 Page 64 1 O'Brien. 1 that. Well, then, let's -- what do we need a 2 detailed transition plan for? We need the detailed 2 COMMISSIONER O'BRIEN: I wonder if after 3 transition plan because you're going to make 3 the colon and the word procedures, this would be 4 helpful or not. Add this clause, that at a minimum 4 changes. This is not rocket science. 5 meets the standards articulated above. And it seems 5 CHAIR BOYD: Commissioner Wergin. COMMISSIONER WERGIN: Mr. Chair, my 6 6 to me the answer to that question will speak volumes question, Commissioner O'Brien, would that then 7 7 about what we're getting into. And I suspect the 8 8 answer will be, no, we can't possibly agree to that. eliminate any changes, even if they're good? That's 9 COMMISSIONER WERGIN: Mr. Chair, 9 the way I would read it. 10 Commissioner O'Brien, would you repeat the sentence 10 COMMISSIONER O'BRIEN: Well, what I that you had? 11 believe is that functionally equivalent support, 11 COMMISSIONER O'BRIEN: That at a minimum data, functionality, performance, electronic 12 12 flow-through and electronic bonding are standards 13 meets the standards articulated above. 13 CHAIR BOYD: Where is above? You're 14 that are important to us that are going to be 14 changed in this transaction at some point. I'm 15 referring to --15 going to make that as a prediction. I suspect COMMISSIONER O'BRIEN: It would be the 16 16 17 sentence that precedes it. Those are standards, 17 that's what's going to happen. 18 that's what we want, they can get new, but they 18 MS. MASTERTON: Mr. Chairman, can't vary from those standards. Let's find out 19 Commissioner, I just want to understand, because I 19 think the original language that you proposed was what they're going to do. 20 20 what Mr. Topp I think was saying we were fine with. 21 CHAIR BOYD: Mr. Lipschultz. 21 And that was to take that last sentence and say 22 MR. LIPSCHULTZ: Mr. Chair, I believe 22 23 that really does get at the nub of this. We're 23 after the period noted above, the merged company looking for a standard and the procedures need to will not replace or integrate Qwest systems without 24 24 first establishing that they meet the standards --25 follow from and make sure that those standards are 25

that at a minimum they meet the standards articulated above. Is that what you – I mean, I think that was something that we felt – COMMISSIONER O'BRIEN: What I did was to, after the word procedures, strike colon, and insert – or insert between procedures and colon that at a minimum meets the standards articulated above. Then colon. MIS. MASTERTON: I mean, the only problem I have is the standards are actually – I mean, the procedures meeting that we without first establishing a detailed transition plan. And so that a runimum need – you need the second sentence because you're going to have a transition plan and that will or might affect functionally equivalent support, data, functionally, performance, electronic flow-through and electronic bonding. So I'm not so worried about the think that any system needs to meet those standards and I think that any system needs to meet those standards and I think that any system needs to meet those standards and I think that any system needs to meet those standards and I think that any system needs to meet those standards and I think that any system needs to meet those standards and I think that any system needs to meet those standards and I think that any system needs to meet those standards and I think that any system needs to meet those standards and I think that any system needs to meet those standards and I think that any system needs to meet those standards and I think that any system needs to meet those standards and I think that any system needs to meet those standards and I think that any system needs to meet those standards and I think that any system need so the procedures. COMMISSIONER O'BRIEN: Transition plan, I think that any system needs to meet those standards and I think that any system needs to meet those standards and I think that any system needs to meet those standards and I think that any system needs to meet the second standards and I think that any system needs to meet the second standards and I think that any system needs to meet the second standards				5 63
articulated above. Is that what you — I mean, I think that was something that we foll — COMMISSIONER O'BRIEN: What I did was to, after the word procedures, strike colon, and insert — or insert between procedures and colon that at a minimum meets the standards articulated above. Then colon. MS. MASTERTON: I mean, the only problem I have is the standards are actually — I mean, the procedures are actually things about the majority vote and that kind of thing, and you're sort of saying that they — I mean, the procedures meeting the standards, I think they don't — they don't really follow together. O'COMMISSIONER O'BRIEN: My focus was on transition plan. You need — you need the second sentence because you're going to have a transition plan what will or might affect functionally equivalent support, data, functionally, performance, electronic Bow-through and becirronic bonding. So I'm not so worried about a riculated above whether what I am affaid might the same thing. And so maybe just striking the last sentence — COMMISSIONER O'BRIEN: Transition plan. The plan think that any system needs to meet those standards and I think that's why you're saying, I think I was confused about trying to say the procedures. COMMISSIONER O'BRIEN: O'Commissioner, the procedures actually are listed. I wonder — and I understand what your changes and think that any system needs to meet those standards and I think that's why you're saying, I think I was confused about trying to say the procedures. COMMISSIONER O'BRIEN: Transition plan, I'm not too concerned about procedures. COMMISSIONER O'BRIEN: Transition plan, I'm not too concerned about procedures. COMMISSIONER O'BRIEN: O'Course. MS. MASTERTON: Cokay. I mean, that might work, if you'd strike everything and then after transition plan a minimum meets the standards articulated above. The chair of the heap of the heap of the standards articulated above. The chair of the heap of	,	Page 65		Page 6/
think that was something that we felt COMMISSIONER O'BRIEN: What I did was to, after the word procedures, strike colon, and insert or insert between procedures and colon that at a minimum menets the standards articulated above. Then colon. MS. MASTERTON: I mean, the only problem I have is the standards are actually I mean, the procedures are actually things about the majority cote and that kind of thing, and you're sort of saying that they I mean, the procedures meeting the standards, I think they don't they don't really follow together. COMMISSIONER O'BRIEN: My focus was on transition plan. You need you need the second sentence because you're going to have a transition plan that will or might affect functionally equivalent functionally equivalent support, data, functionality, performance, electronic flow-through and electronic bonding. So I'm not so worried about procedures as I an transition plan. And so that articulates standards for what you're going to have these questions. Page 66 happen is, in fact, being suggested as you answer these questions. MS. MASTERTON: Mr. Chairman, Commissioner, I mean, It hink work agreeing that we think that any system needs to meet those standards and I think that's what you're saying. I think I was confused about trying to say the procedures and I think that's what you're saying. I think I was confused about trying to say the procedures chink that any system needs to meet those standards and I think that's what you're saying. I think I was confused about trying to say the procedures COMMISSIONER O'BRIEN: Transition plan, The not too concerned about procedure. COMMISSIONER O'BRIEN: Transition plan, The not too concerned about procedures COMMISSIONER O'BRIEN: Transition plan, The not too concerned about procedures COMMISSIONER O'BRIEN: Transition plan, The not too concerned about procedures COMMISSIONER O'BRIEN: Transition plan, The not too concerned about procedures COMMISSIONER O'BRIEN: Transition plan, COMMISSIONER O'BRIEN: Transition plan, The tr	1	that at a minimum they meet the standards	1	before the word and, in the second to last line.
COMMISSIONER O'BRIEN: What I did was to, after the word procedures, strike colon, and insert — or insert between procedures and colon that at a minimum meets the standards articulated above. Then colon. MS. MASTERTON: I mean, the only problem 1 have is the standards are actually — I mean, the 11 procedures are actually things about the majority vote and that kind of thing, and you're sort of 12 saying that they — I mean, the procedures meeting 13 the standards, I think they don't — they don't 14 really follow together. COMMISSIONER O'BRIEN: My focus was on 16 sentence because you're going to have a transition plan that will or might affect functionally equivalent support, data, functionality, performance, electronic flow-through and electronic bonding. So I'm not so worried about 22 and I'm trying to see whether what I am afraid might 25 and I'm trying to see whether what I am afraid might 12 ms same thing. And so maybe just striking the last sentence — COMMISSIONER O'BRIEN: Transition plan, 1 m not too concerned about procedures. COMMISSIONER O'BRIEN: O'Commissioner word and think thar's what you're soing to do, and I'm trying to see whether what I am afraid might 12 ms and because I don't think those are the same thing. And so maybe just striking the last sentence — COMMISSIONER O'BRIEN: Transition plan, 1 m not too concerned about procedures. COMMISSIONER O'BRIEN: O'Commissioner Word be fine if that referred to the procedures as set to have following procedures as set to have following procedures. CHAIR BOYD: You're worried about the transition plan, 1 m not too concerned about procedure. CHAIR BOYD: You're worried about the transition plan, 1 m not too concerned about procedures. CHAIR BOYD: South and the procedure meet those standards that any system as without establishing — without establishing a detailed transition plan and lead to a minimum meets the standards and transition plan and lead transition plan and the procedures are a mainimum meets the standards as transition plan and the procedure s	2	articulated above. Is that what you I mean, I	2	CHAIR BOYD: Why don't you read the last
after the word procedures, strike colon, and insert or insert between procedures and colon that at a minimum meets the standards articulated above. Then colon. MS. MASTERTON: I mean, the only problem I have is the standards are actually I mean, the procedures are actually things about the majority vote and that kind of thing, and you're sort of saying that they I mean, the procedures meeting the standards, I think they don't they don't really follow together. COMMISSIONER O'BRIEN: My focus was on transition plan. You need you need the second sentence because you're going to have a transition plan that will or might affect functionally equivalent functionally equivalent functionally equivalent functionally equivalent and electronic bonding. So I'm not so worried about procedures as I am transition plan. And so that are delectronic bonding. So I'm not so worried about procedures as I am transition plan. And so that are those standards because I don't think those are the same thing. And so maybe just striking the last commissioner, I mean, I think we're agreeing that we think that any system needs to meet those standards baccuse I don't think those are the same thing. And so maybe just striking the last commissioner, I mean, I think we're agreeing that we those standards because I don't think those are the same thing. And so maybe just striking the last commissioner, I mean, I think we're agreeing that we those standards because I don't think those are the same thing. And so maybe just striking the last commissioner, I mean, I think we're agreeing that we those standards because I don't think those are the same thing. And so maybe just striking the last commissioner, I mean, I think we're agreeing that we those standards because I don't think those are the same thing. And so maybe just striking the last commissioner, large and the transition plan and at a minimum meets the standards articulated above. MS. MASTERTON: Okay. I mean, the only problem and the transition plan and at a minimum	3	think that was something that we felt	3	sentence, then.
insert —or insert between procedures and colon that at a minimum meets the standards articulated above. Then colon. MS. MASTERTON: I mean, the only problem I have is the standards are actually — I mean, the procedures are actually things about the majority vote and that kind of thing, and you're sort of saying that they — I mean, the procedures meeting the standards, I think they don't — they don't read that standards, I think they don't — they don't read that standards, I think they don't — they don't read that standards, I think they don't — they don't read the standards, I think they don't — they don't read the standards, I think they don't — they don't read the standards, I think they don't — they don't read the standards, I think they don't — they don't read they standards for think they don't — they don't read the standards, I think they don't — they don't read they standards as the standards to plan that will or might affect functionally of electronic flow-through and electronic bonding. So I'm not so worried about procedures as I am transition plan. And so that a riculates standards for what you're going to do, and I'm trying to see whether what I am afraid might was confused about trying to say the procedures meet those standards because I don't think those are the same thing. And so maybe just striking the last sentence — COMMISSIONER O'BRIEN: Transition plan, not the procedures. COMMISSIONER O'BRIEN: Transition plan, at a minimum meets the standards articulated above and complying with the following procedures. COMMISSIONER O'BRIEN: Yes, I haven't part any language in to what the procedures are, but the procedures are thange standards what you're going to do, articulated about procedures are the same thing. And so maybe just striking the last sentence — COMMISSIONER O'BRIEN: Transition plan, not the procedures. COMMISSIONER O'BRIEN: Transition plan, at a minimum meets the standards articulated above. A complete the standards are causely are into what the procedures withing the back to what followi	4	COMMISSIONER O'BRIEN: What I did was to,	4	COMMISSIONER O'BRIEN: After the period
insert —or insert between procedures and colon that at a minimum mest the standards articulated above. Then colon. MS.MASTERTON: I mean, the only problem I have is the standards are actually — I mean, the procedures are actually things about the majority tote and that kind of thing, and you're sort of saying that they — I mean, the procedures meeting the standards, I think they don't — they don't read that kind of thing, and you're sort of commissioner wergin. COMMISSIONER OFBRIEN: My focus was on transition plan that will or might affect functionally equivalent support, data, functionality, performance, electronic flow-through and celectronic bonding. So I'm not so worried about procedures as I am transition plan. And so that articulates standards for what you're going to do. 2 and electronic bonding. So I'm not so worried about procedures as I am transition plan. And so that articulates standards for what you're going to do. 2 and I'm trying to see whether what I am afraid might Page 66 happen is, in fact, being suggested as you answer these questions. MS. MASTERTON: Mr. Chairman, Commissioner, I mean, I think we're agreeing that we think that any system needs to meet those standards and I think that's what you're saying. I think I was confused about trying to say the procedures meet those standards because I don't think those are the same thing. And so maybe just striking the last section plan, not the procedures. COMMISSIONER OBRIEN: Transition plan, 1 m an iminimum meets the standards articulated above and complying with the following procedures. COMMISSIONER OBRIEN: 12 m chair and in the standards articulated above and complying with the following procedures. COMMISSIONER OBRIEN: 15 mean, the procedures are actually are integrated to what following procedures are the same thing. And so maybe just striking the last section plan, not the procedures meet those standards articulated above. Ms. MASTERTON: -Okay. I mean, that might work, if you'd strike everything and then after transition plan. COMMISS	5	after the word procedures, strike colon, and	5	noted above, the merged company will not replace or
that at a minimum meets the standards articulated above. Then colon. MS. MASTERTON: I mean, the only problem I have is the standards are actually – I mean, the procedures actually hings about the majority vote and that kind of thing, and you're sort of saying that they – I mean, the procedures meeting the standards, I think they don't really follow together. COMMISSIONER O'BRIEN: My focus was on transition plan and transition plan, You need – you need the second sentence because you're going to have a transition plan that will or might affect functionally equivalent – functionally equivalent – functionally equivalent support, data, and electronic bonding. So I'm not so worried about procedures as I am transition plan. And so that articulates standards for what you're going to do, and I'm trying to see whether what I am afraid might Description of the procedures and I think that's what you're saying. I think I was confused about trying to say the procedures meet those standards because I don't think those are the same thing. And so maybe just striking the last sentence — COMMISSIONER O'BRIEN: Transition plan, To too concerned about procedure. CHAIR BOYD: You're worried about the transition plan, and the procedures meet those standards because I don't think those are the same thing. And so maybe just striking the last sentence — CHAIR BOYD: You're worried about the transition plan, and the procedures. CHAIR BOYD: You're worried about the procedures meet those standards because I don't think those are the same thing. And so maybe just striking the last sentence — CHAIR BOYD: You're worried about the transition plan and the nafter transition plan and tra	6		6	
abow. Then colon MS. MASTERTON: I mean, the only problem I have is the standards are actually — I mean, the procedures are actually from the procedures meeting the standards, I think they don't — they don't colon of thing, and you're sort of saying that they — I mean, the procedures meeting the standards, I think they don't — they don't colon of thing, and you're sort of colon Missioner Mergin. COMMISSIONER O'BRIEN: My focus was on transition plan. You need — you need the second sentence because you're going to have a transition plan that will or might affect functionally equivalent — functionally equivalent support, data, functionally, performance, electronic flow-through and electronic bonding. So I'm not so worried about articulates standards for what you're going to do, and I'm trying to see whether what I am afraid might MS. MASTERTON: Mr. Chairman, commissioner, the procedures actually are listed. I wonder — and I understand what your concern is, I wonder if you couldn't just say something like the procedures outlined in the Page 68 happen is, in fact, being suggested as you answer these questions. MS. MASTERTON: Mr. Chairman, Commissioner, I mean, I think we're agreeing that we think that any system needs to meet those standards and I think that's what you're saying. I think I was confused about trying to say the procedures meet those standards because I don't think those are the same thing. And so maybe just striking the last sentence — COMMISSIONER O'BRIEN: Transition plan, transition plan an the procedures. CHAIR BOYD: Vour'e worried about the transition plan and the procedures are the sandards. COMMISSIONER O'BRIEN: Of course. MS. MASTERTON: Clay. I mean, that might work, if you'd strike verything and then after transition plan — COMMISSIONER O'BRIEN: Right. MS. MASTERTON: - I think that would MS. MASTERTON: - I think that would Service the procedures are the sarch and so the procedures are the sequestions. Read of the transition plan and the after transition plan are the procedures.	7		7	
MS_MASTERTON: I mean, the only problem I have is the standards are actually - I mean, the procedures are actually things about the majority vote and that kind of thing, and you're sort of saying that they - I mean, the procedures meeting the standards, I think they don't - they don't really follow together. COMMISSIONER OBRIEN: My focus was on COMMISSIONER OBRIEN: My focus was on COMMISSIONER OBRIEN: My focus was on transition plan. You need - you need the second sentence because you're going to have a transition plan that will or might affect functionally equivalent - functionally equivalent support, data, functionality, performance, electronic flow-through and electronic bonding. So I'm not so worried about procedures as I am transition plan, And so that articulates standards for what you're going to do, and I'm trying to see whether what I am afraid might Page 65 happen is, in fact, being suggested as you answer those equestions. MS_MASTERTON: Mr. Chairman, Commissioner, I mean, I think we're agreeing that we think that any system needs to meet those standards and I think that's what you're saying. I think I was confused about trying to say the procedures meet those standards because I don't think those are the same thing. And so maybe just striking the last sentence - CCMMISSIONER O'BRIEN: Transition plan, T mot too concerned about trying to say the procedures CMMISSIONER O'BRIEN: So we don't need to have following procedures, actually the procedures as I am Interpretated above, MS_MASTERTON: Wr. Chairman, Commissioner, the procedures actually are isited. I wonder - and I undertand what you'r concern is, I wonder if you couldn't just say something like the procedures actually are isited. I wonder - and I undertand what you'r concern is, I wonder if you couldn't just say something like the procedures are - Mr. Lipschultz. MR. LIPSCHULTZ: Mr. Chair, I mean, we'd be Integra settlement agreement, would that be appropriate? MR. LIPSCHULTZ: Mr. Chair, i'm' COMMISSIONER O'BRIEN: So we don't need to have followi	8		8	
In lawe is the standards are actually — I mean, the procedures are actually things about the majority and the transition plan. And so maybe just striking the last sentence — COMMISSIONER WERGIN: Mr. Chair. In lawe is the standards, I think they don't end of thing, and you're sort of saying that they — I mean, the procedures meeting the standards, I think they don't — they don't they don't — they don't they don't early follow together. COMMISSIONER WERGIN: Then we still are back to what following procedures? COMMISSIONER O'BRIEN: Yes, I haven't put any language in to what the procedures are, but the procedures can't change standards. CHAIR BOYD: Ms. Masteron. MS. MASTERTON: Mr. Chairman, Commissioner, I mean, I think we're agreeing that we think that any system needs to meet those standards and I think that's what you're saying. I think I was confused about trying to say the procedures meet those standards because I don't think those are the same thing. And so maybe just striking the last sentence — COMMISSIONER O'BRIEN: Transition plan, and the procedures. COMMISSIONER WERGIN: Then we still are back to what following standards. COMMISSIONER O'BRIEN: Yes, I haven't put any language in to what the procedures are, but the procedures can't change standards. CHAIR BOYD: Ms. Masteron. MS. MASTERTON: Mr. Chairman, Commissioner, I mean, I think we're agreeing that we think that any system needs to meet those standards and I think that's what you're saying. I think I was confused about trying to say the procedures meet those standards because I don't think those are the same thing. And so maybe just striking the last sentence — COMMISSIONER O'BRIEN: Transition plan, 1 fm not too concerned about procedures. COMMISSIONER O'BRIEN: Transition plan, 1 fm not too concerned about procedures. COMMISSIONER O'BRIEN: Transition plan that at a minimum meets the standards articulated above. MS. MASTERTON: Mr. Chair, just to follow up. Mr. Lipschultz, you'd be fine with that, except there'd be a dispute on whether to inclu				
procedures are actually things about the majority vote and that kind of thing, and you're sort of sanging that they – I mean, the procedures meeting the standards, I think they don't – they don't really follow together. COMMISSIONER O'BRIEN: My focus was on transition plan. You need – you need the second sensetine because you're going to have a transition plan. You need – you need the second sensetine because you're going to have a transition plan that will or might affect functionally equivalent – functionally equivalent support, data, functionality, performance, electronic flow-through and electronic bonding. So I'm not so worried about procedures as I am transition plan, and I'm trying to see whether what I am afraid might these questions. MS. MASTERTON: Mr. Chairman, Commissioner, I mean, I think we're agreeing that we think that any system needs to meet those standards and I think that's what you're saying. I think I was confused about trying to say the procedures meet those standards because I don't hink those are the same thing. And so maybe just striking the last sentence — COMMISSIONER O'BRIEN: Transition plan, Think I was confused about trying to say the procedure meet those standards because I don't hink those are the same thing. And so maybe just striking the last sentence — COMMISSIONER O'BRIEN: Transition plan, Think I was confused about trying to say the procedures meet those standards because I don't hink those are the same thing. And so maybe just striking the last sentence — COMMISSIONER O'BRIEN: Transition plan, Think I was confused about procedures. COMMISSIONER O'BRIEN: Transition plan, Think I was confused about procedures. COMMISSIONER O'BRIEN: O'Course. MS. MASTERTON: And the action of the with that any system needs to meet those standards because I don't hink those are the same thing. And so maybe just striking the last sentence — COMMISSIONER O'BRIEN: O'Course. MS. MASTERTON: And Mr. Chair, used be first that referred to the procedures as set forth in the Integra settlement a			l e	
vote and that kind of thing, and you're sort of saying that they – I mean, the procedures meeting the standards, I think they don't – they don't really follow together. COMMISSIONER WERGIN: Then we still are back to what following procedures? COMMISSIONER O'BRIEN: Yes, I haven't put any language in to what the procedures are, but the procedures can't change standards. CHAIR BOYD: Ms. Masterton. 17 In the standards, I think they don't – they don't transition plan. You need – you need the second sentence because you're going to have a transition plan that will or might affect functionally equivalent support, data, functionality, performance, electronic flow-through and electronic bonding. So I'm not so worried about procedures as I am transition plan, and so that articulates standards for what you're going to do, and I'm trying to see whether what I am afriaid might Page 66 happen is, in fact, being suggested as you answer these questions. MS. MASTERTON: Mr. Chairman, Commissioner, I mean, I think we're agreeing that we think that any system needs to meet those standards and I think that's what you're saying. I think I was confused about trying to say the procedures meet those standards because I don't hink those are the same thing. And so maybe just striking the last sentence – COMMISSIONER O'BRIEN: Transition plan, not the procedures. COMMISSIONER O'BRIEN: Transition plan, not the procedures. COMMISSIONER O'BRIEN: Transition plan, not the procedures. COMMISSIONER O'BRIEN: Right. COMMISSIONER O'BRIEN: Right. MS. MASTERTON: And the attantion plan that at a minimum meets the standards articulated above. MS. MASTERTON: And the attantion plan that at a minimum meets the standards articulated above. MS. MASTERTON: And the decomplete of the procedures as the standards articulated above. MS. MASTERTON: And the decomplete of the procedures as the standards articulated above. MS. MASTERTON: And the national plan that at a minimum meets the standards articulated above. MS. MASTERTON: And then after transi		•		_
saying that they — I mean, the procedures meeting the standards, I think they don't — they don't really follow together. COMMISSIONER O'BRIEN: My focus was on transition plan. You need — you need the second sentence because you're going to have a transition plan that will or might affect functionally equivalent — functionally equivalent support, data, functionality, performance, electronic flow-through and electronic bonding. So I'm not so worried about procedures as al marnsition plan. And so that articulates standards for what you're going to do, and I'm trying to see whether what I am affaid might Page 66 happen is, in fact, being suggested as you answer these questions. MS. MASTERTON: Mr. Chairman, Commissioner, I mean, I think we're agreeing that we think that amy system needs to meet those standards and I think that's what you're saying. I think I was confused about trying to say the procedures meet those standards because I don't think those are the same thing. And so maybe just striking the last cOMMISSIONER O'BRIEN: Transition plan, I'm not too concerned about procedure. CHAIR BOYD: You're and I understand what your concern is, I wonder if you couldn't just say something like the procedures outlined in the paper is, in fact, being suggested as you answer these questions. MS. MASTERTON: Mr. Chairman, Commissioner, I mean, I think we're agreeing that we think that any system needs to meet those standards and I think that's what you're saying. I think I was confused about trying to say the procedures meet those standards because I don't think those are the same thing. And so maybe just striking the last commissioner, I mean, I think we're agreeing that we transition plan, not the procedures. CHAIR BOYD: Procedures are — Mr. Lipschult.72: Mr. Chair, I mean, we'd be fine if that referred to the procedures as set forth in the Integra settlement at the end, we'd be of have following, you can just strike following and say — COMMISSIONER O'BRIEN: Transition plan, in not too concerned about procedure. W				
the standards, I think they don't really follow together. COMMISSIONER O'BRIEN: My focus was on transition plan. You need you need the second sentence because you're going to have a transition plan that will or might affect functionally equivalent support, data, functionality, performance, electronic flow-through and electronic bonding. So I'm not so worried about procedures as I am transition plan. And so that articulates standards for what you're going to do, and I'm trying to see whether what I am afraid might Page 66 happen is, in fact, being suggested as you answer these questions. MS. MASTERTON: Mr. Chairman, commissioner, I mean, I think we're agreeing that we think that any system needs to meet those standards and I think that's what you're saying. I think I was confused about trying to say the procedures meet those standards because I don't think those are the same thing. And so maybe just striking the last confused about trying to say the procedures meet those standards because I don't think those are the same thing. And so maybe just striking the last confused about trying to say the procedures. COMMISSIONER O'BRIEN: Transition plan, at a minimum meets the standards articulated above. The more data at a minimum meets the standards articulated above. MS. MASTERTON: Okay. I mean, that might work, if you'd strike everything and then after transition plan — 1 COMMISSIONER O'BRIEN: Right. MS. MASTERTON: — 1 think that would back to what following procedures are, but the transition plan. 17 and plan that will or might affect during and transition plan transition plan at at a minimum meets the standards articulated above. 17 COMMISSIONER O'BRIEN: Of course. 10 MS. MASTERTON: Mr. Chairman, 11 COMMISSIONER O'BRIEN: Of course. 10 MS. MASTERTON: Mr. Chair, I mean, that might were agreeing that we think that any system needs to make a minimum meets the standards articulated above. 17 COMMISSIONER O'BRIEN: Of course. 10 MS. MASTERTON: MA. I mean, that might were agreeing that we think that are animi				
really follow together. COMMISSIONER O'BRIEN: My focus was on transition plan. You need - you need the second sentence because you're going to have a transition plan that will or might affect functionally equivalent support, data, functionality, performance, electronic flow-through and electronic bonding. So I'm not so worried about 23 procedures as I am transition plan. And so that articulates standards for what you're going to do, and I'm trying to see whether what I am afraid might procedures are lusted. I wonder if you couldn't just say something like the procedures actually are listed. I wonder - and I understand what your concern is, I wonder if you couldn't just say something like the procedures actually are listed. I wonder - and I understand what your concern is, I wonder if you couldn't just say something like the procedures outlined in the pape is, in fact, being suggested as you answer these questions. MS. MASTERTON: Mr. Chairman, Commissioner, I mean, I think we're agreeing that we think that any system needs to meet those standards and I think that's what you're saying. I think I was confused about trying to say the procedures meet those standards because I don't think those are the same thing. And so maybe just striking the last sentence - COMMISSIONER O'BRIEN: Transition plan, I mot too concerned about procedures. Without establishing a detailed transition plan tat at a minimum meets the standards articulated above. MS. MASTERTON: Okay. I mean, that might work, if you'd strike everything and then after transition plan - COMMISSIONER O'BRIEN: Right. MS. MASTERTON: Wro moried about the transition plan - COMMISSIONER O'BRIEN: Right. MS. MASTERTON: Wro worried about the transition plan at at a minimum meets the standards articulated above. MS. MASTERTON: I think that would				
transition plan. You need — you need the second transition plan. You need — you need the second glasset need because you're going to have a transition plan that will or might affect functionally equivalent support, data, functionally equivalent support, data, functionally equivalent support, data, functionality performance, electronic flow-through and electronic bonding. So I'm not so worried about procedures as I am transition plan. And so that articulates standards for what you're going to do, and I'm trying to see whether what I am afraid might. Page 66 happen is, in fact, being suggested as you answer these questions. MS. MASTERTON: Mr. Chairman, Commissioner, I mean, I think we're agreeing that we think that any system needs to meet those standards and I think that's what you're saying. I think I was confused about trying to say the procedures meet those standards because I don't think those are the same thing. And so maybe just striking the last concerned about trying to say the procedures. COMMISSIONER O'BRIEN: Transition plan, I mn to to concerned about procedures. COMMISSIONER O'BRIEN: Transition plan tat at a minimum meets the standards articulated above. MS. MASTERTON: Oko. I mean, that might work, if you'd strike everything and then after transition plan — COMMISSIONER O'BRIEN: Right. MS. MASTERTON: Diverse of the first paragraph of the Integra settlement at the procedures actually are listed. I wonder — and I understand what your concern is, I wonder if you couldn't just say something like the procedures outlined in the Page 68 Integra settlement agreement, would that be appropriate? MR. LIPSCHULTZ: And, Mr. Chair, we'd be — CHAIR BOYD: Procedures as set forth in the Integra settlement at the end, we'd be okay with that. COMMISSIONER O'BRIEN: Transition plan, I mot too concerned about procedures. COMMISSIONER PUGH: And, Mr. Chair, just to follow up. Mr. Li				
transition plan. You need — you need the second sentence because you're going to have a transition plan that will or might affect functionally equivalent — functionally equivalent support, data, functionality, performance, electronic flow-through and electronic bonding. So I'm not so worried about procedures as I am transition plan. And so that articulates standards for what you're going to do, and I'm trying to see whether what I am afraid might Page 66 happen is, in fact, being suggested as you answer these questions. MS. MASTERTON: Mr. Chairman, Commissioner, the procedures, actually, this is like the first paragraph of the Integra settlement agreement, and so the procedures actually are listed. I wonder — and I understand what you'r concern is, I wonder if you couldn't just say something like the procedures outlined in the Page 66 happen is, in fact, being suggested as you answer these questions. MS. MASTERTON: Mr. Chairman, Commissioner, I mean, I think we're agreeing that we think that any system needs to meet those standards and I think that's what you're saying. I think I was confused about trying to say the procedures meet those standards because I don't think those are the same thing, And so maybe just striking the last sentence — COMMISSIONER O'BRIEN: Transition plan, Thm not too concerned about procedure. COMMISSIONER O'BRIEN: Transition plan that at a minimum meets the standards articulated above. MS. MASTERTON: MS. MASTERTON is don't reed to have following, you can just strike following and say — COMMISSIONER PUGH: And, Mr. Chair, just to follow up. Mr. Lipschultz, you'd be fine with that, except there'd be a dispute on whether to include a phrase about electronic — whatever is scratched out on the side there, I can't read it.		•		
sentence because you're going to have a transition plan that will or might affect functionally quivalent support, data, functionally equivalent support, data, functionally expectations, and electronic flow-through agreement, and so the procedures actually are listed. I wonder - and I undersand that your concern is, I wonder - and I undersand tyour concern is, I wonder - and I undersand tyour concern is, I wonder - and I undersand tyour concern is, I wonder - and I undersand tyour		-		
plan that will or might affect functionally equivalent - functionally equivalent support, data, functionality, performance, electronic flow-through and electronic bonding. So I'm not so worried about procedures as I am transition plan. And so that articulates standards for what you're going to do, and I'm trying to see whether what I am afraid might articulates standards for what you're going to do, and I'm trying to see whether what I am afraid might articulates standards for what you're going to do, and I'm trying to see whether what I am afraid might articulates standards for what you're going to do, and I'm trying to see whether what I am afraid might articulates standards for what you're sowned in the something like the procedures actually are listed. I wonder and I understand what your concern is, I wonder if you couldn't just say something like the procedures actually are listed. I wonder and I understand what your concern is, I wonder if you couldn't just say something like the procedures actually are listed. I wonder and I understand what your concern is, I wonder if you couldn't just say something like the procedures actually are listed. I wonder and I understand what your concern is, I wonder if you couldn't just say something like the procedures outlined in the suppropriate? MR. 		· · · · · · · · · · · · · · · · · · ·		· · · · · · · · · · · · · · · · · · ·
24 COMMISSIONER O'BRIEN: So it would be to 24 Pugh, that's correct. The one thing we see missing		1		_ ·
25 add the clause I suggested after the word plan 25 from this that we consider to be important is that	25	add the clause I suggested after the word plan	25	trom this that we consider to be important is that

Page 69

one phrase that, you're right, was scratched out in the margin here. And because, again, that's the linchpin of true e-bonding and electronic flow-through, is getting the same access to the underlying databases, or the equivalent access to the underlying databases. So we just think that's really important to make sure that there's no doubt.

2.5

I mean, if nothing else, what you see in here is how uncertain this is and how difficult this is and how challenging this has been for us and why we want clarity and why we want certainty and why we want things nailed down as much as they can possibly be nailed down. Because in this short time frame I think you have a window into our world here, and that's why that one phrase we think is important and that's why all the others we've been talking about we think are important.

COMMISSIONER PUGH: And, Mr. Chair, just to follow on that. Assuming that Qwest and CenturyLink don't agree to that, and apparently they don't, if, in fact, the standard is that there be electronic flow-through and electronic bonding, they then try to migrate to a different system, which cannot facilitate that because of the -- whatever you have through access in the scratched-out area,

then before we went to a break to talk between the parties I thought I heard Mr. Lipschultz say that the Arizona wording was okay. And now -- now we're back to is e-bonding in or out and is the Arizona wording what we want or not.

Page 71

MR. LIPSCHULTZ: Mr. Chair, Commissioner Wergin, I apologize for the confusion. I mean, I said that the Arizona language is fine except for the omission of that reference to access to underlying databases. So we're okay with the Arizona language with the addition of that phrase referring to underlying databases.

Now, to Commissioner Pugh's point, you ought to get there anyway without that specific reference to underlying databases. Our concern is that without it you've got at least one potential point of confusion in litigation that we might have to bring back before you. But I hope I was clear, and I apologize if I wasn't from the beginning, we're okay with the Arizona language, but for the omission of wording that we would like to have inserted into it referring to the underlying databases.

COMMISSIONER WERGIN: Mr. Chair. I'm not a lawyer. Somebody at that table tell me if

Page 70

they would have failed to meet the standard, would you not be back before us and we could hash out whether or not it works at that time? And I realize there's a cost to that, perhaps, but --

MR. LIPSCHULTZ: Mr. Chair, Commissioner Pugh, you're right. I mean, I think if you need access to underlying databases to get the electronic flow-through and e-bonding that would be guaranteed under this provision, then you would think you'd get the necessary access to the databases. And if we don't get it, yes, we'd be back here and, yes, we would spend money and have to litigate it. And we're just trying to button this down as much as possible to minimize the litigation and to make it as clear as possible, and I think what you're witnessing here today is sort of a reminder of how important it is. But analytically, Commissioner, you're right.

COMMISSIONER PUGH: Thank you.
COMMISSIONER WERGIN: Mr. Chair.
CHAIR BOYD: Commissioner Wergin.
COMMISSIONER WERGIN: Mr. Chair, I'm
hearing some probably conflicting statements. I
thought I heard Mr. Topp say that the e-bonding is
already addressed in the Integra settlement, and

Page 72

e-bonding is actually spelled out in the Integra contract or not. I see it in there, but maybe I'm missing something.

sing something.

CHAIR BOYD: Mr. Topp.

MR. TOPP: Yes, I believe it is.

CHAIR BOYD: Mr. Lipschultz. MR. LIPSCHULTZ: Mr. Chair, Commissioner Wergin, I believe it is. The difference between the Arizona settlement and this Arizona language, and it's the critical language I was talking about earlier, is the Integra settlement uses the phrase not materially less, and this Arizona language, like ours, essentially says it can't be less. It doesn't have a qualifying term materially. It says it can't be less and then it goes on to say it has to provide the functional equivalent of, and it specifically identifies the points we're concerned about. So that was the concern we had primarily with the Integra settlement, is that phrase not materially less, which the ALJ acknowledged is probably going to be the source of a lot of litigation. And I think this language is better than the Integra settlement because it reduces the chances of that litigation and it makes sure we get post-merger what we're accustomed to getting now, or at least makes

Page 73 Page 75 sure of that as best as possible. 1 reference, to access to underlying databases. 1 2 2 COMMISSIONER WERGIN: Mr. Chair. Otherwise, we don't disagree. 3 3 Mr. Lipschultz, forgive me if I sound short, but I COMMISSIONER WERGIN: Mr. Chair, am I 4 4 just heard you say that it's addressed in the wrong in that this is the first time I've heard 5 Integra contract and the words are specifically 5 underlying databases? 6 included here. There's nothing missing. 6 CHAIR BOYD: In two days. 7 7 MR. LIPSCHULTZ: Mr. Chair, Commissioner COMMISSIONER WERGIN: Yes. Okay. Thank 8 8 Wergin, the one -- yeah, the word e-bonding is in 9 both the Integra settlement and the Arizona language 9 CHAIR BOYD: And, Mr. Topp, maybe you 10 10 here. That's correct. What's missing from the want to help us understand why explicit reference to 11 Integra settlement is a clear statement that you 11 the databases is a bad thing? cannot have less OSS quality post-merger than you 12 MR. TOPP: We're concerned -- the 12 have currently. The Integra settlement uses the 13 language, which was heavily negotiated, talks about 13 14 term materially less, which the ALJ said is fraught 14 access to data. Adding a reference to access to underlying databases, it has been unclear to us what 15 with possibility and the likelihood of litigation. 15 So I guess to be clear, yes, e-bonding is in both. 16 exactly that means and whether that in some way 16 17 17 But what's not in both is a clear alters the obligation. We think that their concerns 18 statement that you can't provide service quality 18 are taken care of by this language. We'd like to less than we get today. The Arizona language takes 19 have the language the same from state to state and 19 20 care of that. The Integra settlement did not. 20 therefore we could not agree to this change. 21 CHAIR BOYD: Mr. Lipschultz. 21 COMMISSIONER WERGIN: Well, Mr. Chair, then, Mr. Lipschultz, if we include the Arizona 22 MR. LIPSCHULTZ: Mr. Chair, I'm going to 22 language, we have taken care of e-bonding. Because 23 take a risk here because I'm not in a position to 23 24 the part that refers back to the Integra settlement 24 get ahold of all my clients. deals with -- well, standards, yes, but also the 25 We will agree to drop our insistence on 25 Page 76 Page 74 1 adding that reference to underlying databases with 1 procedures in the Integra agreement. But you have 2 the understanding that I think has been made crystal 2 the sentence above that it refers -- that at a 3 clear here through the questioning of Commissioners 3 minimum, which is exactly what Commissioner Pugh and Wergin that what this language does would 4 O'Brien -- I would think that the sentence that 4 5 Commissioner O'Brien added would address those 5 give us the same level of access to flow-through and 6 e-bonding. And with that understanding, I don't 6 concerns because it says that at a minimum meets the 7 7 want to hold this thing up over language that I standards articulated above and complies with the 8 think at the end of the day we ought to be able to 8 procedures in the Integra settlement. And so the 9 standards, including the electronic bonding, that 9 agree to. 10 standard is above. 10 CHAIR BOYD: All right. Okay. Anything MR, LIPSCHULTZ: Mr. Chair, Commissioner 11 else? No? Last call. 11 12 All right. Let's move on to deliberate, 12 Wergin, I don't think we're disagreeing. I'm just 13 13 telling you my clients want the added assurance of then. 14 having language that says we'll get the same access 14 Commissioner O'Brien. 15 COMMISSIONER O'BRIEN: Mr. Chair, Members to underlying databases. But as I said in response 15 16 to Commissioner Pugh, I think both you and 16 of the Commission. The reason I did not 17 particularly participate in fine-tuning this 17 Commissioner Pugh are correct analytically, that 18 this language should be enough and that we should 18 agreement is that I'm stuck further up the upstream. 19 get the access we need to underlying databases, 19 As Vice President Biden said to President Obama on 20 20 presuming we get the e-bonding and flow-through that the eve of health care legislation, this is a really are provided for in this language. 21 big deal. Now, he used some modifiers that I'll 21 22 22 So analytically I think you and avoid. 23 Commissioner Pugh are correct, I'm just telling you 23 But this is a big deal. This is tens of 24 my clients have told me they want that added billions of dollars. And by statute and law we are 24

charged with the obligation to approve or disapprove

25

assurance that they're going to get, with a specific

25

Page 77

based on public interest. And I'm going to be coming back to public interest a lot in these comments. But the first contextual observation is a lot of money, a big deal.

The first contextual observation, and I'm going to have some contextual observations but I'm going to bring them back into this docket. The first contextual observation is that 30, 40 years ago a federal judge busted up Ma Bell. Congress and the FCC have kind of fine-tuned it, but it was that large it was considered to be in violation of the antitrust laws.

Now, I know that this merger has passed Department of Justice scrutiny, but we should not assume that because it's big, it's good. In this industry we have a record of big leading to higher prices, average service, and lack of innovation. Can anybody doubt that in the last couple of decades we've had a revolution because of the competition in the marketplace? Prices have come down, we have a lot better quality, a lot more service options. So let's not say because this is a big deal and because we're going to create a third largest CLEC, that's something to embrace. It isn't.

So now what does that mean on this

wages, and with those two advantages they get more access to capital. Access to capital allows them to be the acquirer rather than being acquired. It's a

Again, let's put it in context. We are about to begin the 150th anniversary of the Civil War. Some of the South viewed that as a War of Northern Aggression. Other commentators view that as a class of culture. I know slavery was a big issue, but slavery doesn't encompass all of that conflict, it was culture as well.

In the recent few years, Northern legacy industries have been moving from Minnesota to the South. Northwest Airlines is now headquartered in Delta -- in Dallas. Or excuse me, Georgia, Delta. Ford Motor is soon closing a plant while the South is building car plants. And now Qwest is going to Louisiana. Again, that's not a reason to approve or disapprove, but it's context. And we have seen cultural sparks that are -- that we are not used to.

The first would be the dust-up we had a couple of days ago on trade secret. Platitudes on mergers that you can find in any book are elevated to the status of trade secret. Now, they have the right to do that, but we should not lose sight of

Page 78

record? Well, big will prevail. That's the nature of big. They have a lot of muscle. We heard and have been -- we spent the last hour, 45 minutes, on the operating system, critical to this enterprise going forward with the competitors. We need to keep in mind that the national policy was to allow these CLECs to grow and thrive and compete. When you bring a very large player into this market, that is a real threat. Access charges for Sprint are of the same nature and notice. So let's just keep that in mind.

A second observation is social compact. Minnesota is a northern liberal state. I know that we have newspaper stories about a \$6 billion budget gap, but, in fact, we are spending almost \$18 billion in this fiscal year. 75 percent of that goes to education and health care. That is a big investment.

We have to have a wage structure to support that investment because we have high taxes. Qwest had about 29,000 employees, of which 14,000 were union members. CenturyLink has about 20,000 employees, of which 3,700 are union members. They are in a culture that allows for limited investment in public education and health care, that has lower

Page 80

Page 79

the fact that we are dealing with hyperaggressive perspective. Investment reduction is advertised as enhancement. Again, they have the right to do that, it's a question of emphasis, but we're on notice of a culture clash.

The most troubling contextual observation that precedes my views on this is the lack of a record with respect to public interest. Ordinarily, of something this big, this important, we'd have public agencies, the Department of Commerce, attorney general, weighing in, putting on facts and records, challenging the assertion of public interest. That is missing from this record.

What we have is what other states have done. Not all, but others. The ALJ said it's okay, but, again, it wasn't a litigated fact. There wasn't a contrary view of public record -- or public interest. And the Department of Commerce says it's okay.

Well, I don't know. Here's the problem the Communication Workers were put into. Unions represent less than 7 percent of the American work force. I've been a labor relations lawyer for more than 40 years. They are struggling to maintain relevance. They had an offer pre-approval, and I

suspect they were afraid of what a post-approval position would be so they made a -- I suspect, I don't know this, a tactical decision to try to steer the bus rather than to challenge public interest.

In any event, unions don't represent the public interest in the full scope of what we have to do, they have an important part of it. The intervening CLECs do not represent the public interest, they have a business perspective they're trying to hold onto. But there is no organized institutional challenge to this significant merger and that's troubling to me.

Well, are there some public policy reasons to oppose this? Sure. Reduced investment in broadband, both as to the fact, but more importantly how it was presented. Lower credit ratings. Again, that's in the record, we have lower credit ratings in this new merged entity. Two of the three have failed, we're on notice, there may be failure. We have a legacy industry that is going to bear the burden of the \$600 million of synergy.

In the 1930s, Willie Sutton was robbing banks. He was asked why he was robbing banks and he replied, That's where the money is. That's where the savings are. They're here. And we're going to

that are compelling, move at a deliberate pace and the speed of pace and the urgency is not something that comforts me, it is a red flag.

Page 83

Page 84

I believe we have three options. Reject it, the public policy is conclusionary, is not supported in the record and we should not allow it to go forward on this big of a transaction. A second option, we could use our prior precedent, we could bring in experts. We could give the parties the opportunity to cross-examine our experts and present their own experts and develop a public policy record. A third option would be to table this for a while and allow at least the new commissioner to take a look.

I think that when we are about to lose a legacy industry, we should at least have some minimal public record to support that beyond other states have done it and Department of Commerce says it's okay and the other parties that have intervened have cut their deals with the exception of a few CLECs.

That is not public policy, that's not how it should be formed, and I have substantial reservations as to the wisdom of this transaction. Thank you.

see those synergies in increased cost and reduced service. But, mostly, we don't have a sufficient record.

Now, I'd like to talk about the elephant in the living room, something that hasn't been articulated. We have a challenged business model. Qwest is losing 10 percent of landlines a year. And so they hire investment bank or bankers, probably more than one, to get out and see what they can find. We haven't looked at all the deals they looked at, we've looked at the first one. And they're going to merge with a company that's got the same phenomenon, losing business lines, and somehow that is going to create economies of scale. Economies of scale don't address the root cause of this problem. They don't. They simply postpone it.

The elephant in the living room is a suspicion that we have to do this deal 'cause something bad will happen if we don't. Well, where is the record evidence on this? There isn't any. We operate as if there is urgency to this, we gotta get it done, we have to do it, it's time sensitive, we're going to be hyperaggressive on every issue. With what record?

In my view, deals that are inexorable,

CHAIR BOYD: Comments?

Commissioner O'Brien, do you want to offer a motion based on your feelings or would you rather wait?

COMMISSIONER O'BRIEN: Well, you know, as I sat here this morning I saw people jumping into the deal without really -- I mean, it's kind of fun to put together the finishing touches on a 19, 20 billion dollar deal. And I couldn't get into that 'cause I wanted to make sure that we had the right public interest in mind.

So I am always trying to find consensus, and I suspect that -- that we haven't had a lot of questions or -- or interest in public -- in looking critically at public interest. I think that others have reached different conclusions and I want to be respectful of those conclusions, so I prefer to wait and see whether I can find some other support for my thoughts.

> CHAIR BOYD: All right. Appreciate that. Commissioner Pugh.

COMMISSIONER PUGH: Mr. Chair, I'll address the concern actually that I had.

In questioning on Tuesday I was -- the representative from the Department of Commerce,

their attorney, indicated that she was not aware whether or not the new commissioner had, in fact, reviewed this matter and was aware of the position that the Department was, in essence, advocating for approval before us. That was of some concern. And I almost asked on Tuesday to see if they could get a letter saying he was okay with it, coming back today.

But today there was further information and that is with the development of the OSS issue. which I find to be very important, and how that is shaping in -- it appears to be shaping in the best way possible for CLECs in the states that act latest on the issue.

Now, granted, many of the states that have approved this are CenturyLink states that didn't have a Qwest presence previously, in any event, but Arizona, Washington, Oregon and Minnesota have shared certain commonalities with issues facing Owest. I know several years ago Owest sought forbearance on certain issues before the FCC, and Minnesota posed that request along with Arizona, Washington and Colorado, I believe, not Oregon. So we did have common interest in certain issues. Arizona is going to conclude their ALJ

way or any agency or any entity that has said do not

Page 87

let this merger go forward. The ALJ didn't go there, the FCC didn't go there, the Department of Justice didn't go there, numerous states didn't go there, albeit there are differences between states, so I don't -- I don't weigh our judgment on what another state does. I weigh it on what's good in Minnesota, and I think that goes to the ALJ's record.

And I -- I see the public interest having been discussed throughout the record with the ALJ. As you look at each point that the ALJ makes a recommendation or a conclusion, she addresses the public interest in nearly every one. And so while I have concerns, there is no doubt about that, I will freely and quickly say I have concerns, I don't think that they are concerns that would warrant not moving ahead. I think with some of the things that we've done this morning and perhaps a couple of suggestions as we go through the issues, I do see us having as complete a record as we probably could get. So that's where I'm coming from.

CHAIR BOYD: Commissioner O'Brien. COMMISSIONER O'BRIEN: Before CWA withdrew they entered evidence in the record that

Page 86

report in a couple of weeks, so in terms of waiting for something to develop, I don't know that we have a deadline of February 10th in which to act. I might be open to setting our decision back awaiting further comment from the new Commissioner of Commerce and perhaps watching to see the exact language that develops in at least Arizona, but perhaps Arizona, Washington and Oregon, in that they're all kind of going to happen in March, well before the June closing.

So with respect to that issue, I might share some interest in what Commissioner O'Brien is -- has presented. And I'll reserve comments on anything else until we see what the rest of the panel feels like on that issue.

CHAIR BOYD: Thank you. Others? COMMISSIONER WERGIN: Mr. Chair, I'm really not there on delaying and there are actually several reasons. While it might seem as though it's been a hurried decision, there has been -- there is, in fact, a very large record associated with this docket. Many hearings, of course all the briefs and rebuttals and surrebuttals and objections and all the other words that come in there. And there has been -- there really hasn't been anyone along the

Page 88

the CenturyLink acquisition of Embarq resulted in a number of serious operational, service-affecting problems in North Carolina. Including workers being dispatched to incorrect locations for service, workers being dispatched for service with insufficient or incorrect information, longer out of service periods, longer delays of initiating service, differing and confusing software that dispatches and assigns technicians, systems do not appear to be interconnected or coordinated, negative impacts on work flow, inefficiencies in the new systems, consumer frustration about installation, and service appointments not being met and long hold times.

The challenge of integrating and running Qwest with its unique obligations comparatively, enormous customer base, wholesale responsibilities and complex OSS is particularly daunting and far beyond anything CenturyLink has faced to date. And when we get the complaints, when they come in, we can't say we relied for our public policy determination on what the other states did, we can't say we relied on the ALJ, we relied on the Department of Commerce. They all concluded without telling us the factual basis for those conclusions.

Page 89

That's where I'm getting at. We don't know the factual basis. There is no evidence in the record testing public interest. They are conclusions of the public interest. And I think that's an important point.

15.

COMMISSIONER WERGIN: Mr. Chair, Commissioner O'Brien, when I read the part about the service that you just quoted to us, that gave me a great deal of pause reading that there were service issues, there were interconnection issues, there were mistaken dispatches, there were significant issues. And I was -- I spent quite a bit of time thinking about that because this is huge and those are things that you don't want to see happen.

The difficulty that I found myself up against with that particular piece is that any time there's a merger, there are hiccups. And I'm not dismissing how important those service issues are by saying hiccups, I'm just saying no matter what merger you would look at you would find things that happen that are unpleasant in the merger. And one of the best examples I can give of that is that I serve on a board of directors where we have taken individual locations within the same corporation and implemented one database, one system of record

the ALJ, and they didn't have much public interest test on it, but we just kind of trusted them.

Not on this deal, not for me, too big, I don't believe in the trust me standard.

CHAIR BOYD: Commissioner Reha.

COMMISSIONER REHA: Mr. Chair, I appreciate the comments of the Commissioners and this is a difficult case. But I look at the statutory factors that this Commission has to look at. And they're on page 4 of the briefing papers. And I think the record supports the finding that the post-merger company will have the financial, technical, and managerial resources to enable the Qwest and CenturyLink operating companies to continue providing reliable, quality telecommunications services in Minnesota. I think the record supports that conclusion.

And the third one, I'll skip to C, what impact the transaction will have on Commission authority, and I think there's a consensus that it really will not have it.

The one issue is what impact the transaction will have on Minnesota customers and on competition in the local telecommunications market, and that item concerns me, as I think I've expressed

Page 90

accountability, and the number of hiccups, glitches, incidents, have been significant, and that was with one entity meshing its own systems.

And so in a -- I would prefer that we had no system errors, no dispatch errors, anything like that, but I don't know that in any merger, whether it be two smaller CLECs, I don't know that we wouldn't see any of that. What sort of nullified that for me or sort of comforted me with that is that the CWA did ultimately settle. And my -- I would suspect that as part of the discussion with that settlement, those issues that they indicated are very important were, at the very least, strongly discussed.

COMMISSIONER O'BRIEN: Yes, of course. Mr. Chair, of course, this was their position and their case was settled so we can't rely on these facts, I get that. But we're on notice. The bell has been rung, it's hard to unring the bell. And there wasn't a bell rung by the Department of Commerce.

And, remember, the record is that two out of three of these types of big deals have failed, and in failure will it really be sufficient to say, you know, geez, we relied on Commerce, we relied on previously.

I -- we have to determine what's in the public interest. And as it stands with just the ALJ's recommendations, it's my view that it's not in the public interest now, but I think it's fixable. I think it's fixable by putting in the assurances that the CLECs have -- many, not all, but some of the assurances and the CLECs and the intervening parties have proposed here. The most important one has to do with the OSS and the OSS testing, as we've discussed.

And in my view, I think that with the synergies that are supposed to be recouped here by the new applicants, that I don't think it'll be harmful to their operations to have third-party testing, which will provide the assurances that the intervenors have proposed here today, and the extension of the existing Qwest systems for the period of time that the extensions are recommended.

There are others, like the -- that, you know, I really feel that should be made, which we didn't really specifically talk about today, but, you know, having one -- one point of interconnection, I think that that, in my view, that's a no-brainer. I think the parties -- the

Page 92

Page 91

23 (Pages 89 to 92)

Page 93

applicant could easily provide that. And they are going to be merging the two systems together and they could certainly merge that, and I didn't really hear very strong evidence that that should not be completed. And there are others in here, I mean, we could go one by one and I could talk about that.

But, so I think that the -- this approval, while in my view right now it is not in the public interest, it could be fixed and that we should attempt to fix it by stating that these factors need to be included before this Commission approves it.

I don't know what really can be gained by a delay. I think we have a very robust record here, I think the briefing papers are excellent, I think the parties' briefs are thorough. I agree with you, Commissioner O'Brien, it would have been nice to have the Department more involved in this matter, and rather than having settled quickly and then not providing the challenges and the discussion and the witnesses and all of that. I mean, that probably would have been a better record. But this is the record we have and I think it would stand up on appeal with respect to most of these items.

1 COMMISSIONER REHA: Right.

COMMISSIONER PUGH: -- it wouldn't meet the public interest test --

Page 95

Page 96

COMMISSIONER REHA: Correct.

COMMISSIONER PUGH: -- do you see any -- do you have any interest in waiting to see what Arizona, Washington and Oregon do, in terms of additional considerations or conditions that might aid in our determination as to our public interest?

COMMISSIONER REHA: Well, I -- we could -- we could wait forever for those kinds of things. There's always going to be something that comes up. We've got to decide it on the basis of what's important for Minnesota. So I think, you know, it's interesting what other states are doing. You know, I think we could probably borrow some of the ideas, whether or not there's a final commission action in Arizona or wherever. It's our case, it's Minnesota, and the -- I think the issue is the items A, B and C relate to Minnesota. And so I don't think we have to wait.

COMMISSIONER PUGH: Mr. Chair, my only response would be the timing of the hearing was essentially at the request of the petitioning parties, not --

Page 94

Well, you know, we can't delay everything every time there's a change in administration or a change in commissioners or a change in attorneys or a change in anything, and I think if there were some strong objections by now we would have heard something. And we haven't. Silence is deafening. So, and the new commissioner has been in place for some time now. So I don't think we should delay it on that basis.

And the issue of the new commissioner.

We have the attorney for the Department sitting here at the desk and -- and she said that she hadn't heard any intention to interfere with the process as it's been going on, so I think that that's something that we shouldn't go there, in my opinion.

So I think it's fixable, and I think that we have enough information to do that today. So, that's my opinion, my read.

CHAIR BOYD: Commissioner Pugh.
COMMISSIONER PUGH: One follow-up to
Commissioner Reha. Since your opinion is that as it
is without further conditions --

COMMISSIONER REHA: Yes.
COMMISSIONER PUGH: -- beyond the settlements --

COMMISSIONER REHA: Yeah. Nothing's perfect.

COMMISSIONER PUGH: -- the closure of negotiations, negotiations by all parties on what is a nationwide transaction, it's not really a Minnesota transaction. It seems as though the bargaining becomes -- the bargaining positions become stronger as the closing date becomes closer, and that would be my only observation. I don't intend, I guess, to push on it. I suspect we'd have the availability to move for reconsideration if, in fact, there was some incredible breakthrough in some other state at a later time. I maybe look to staff to assure me that that would be, so long as a party votes correctly, a Commissioner votes correctly, we'd be able to move for reconsideration to amend the --

CHAIR BOYD: The Commission always has that authority on their own.

COMMISSIONER PUGH: So, just to be sure. CHAIR BOYD: I understand Commissioner O'Brien's frustration and I share it in part. At the end of the day, I think this is a very substantial record. We've yet to find a perfect record in any proceeding, I think it's adequate to

Page 97

move forward. I share Commissioner Reha's comments about waiting on the new Commissioner of Commerce. We have a number of important proceedings that move forward and move forward and move forward, and while I respect his opinion, I might be curious what he thinks about this, I don't know that that's grounds onto itself for any delay.

I suspect, Commissioner Pugh, if there was to date any significant nugget in those other states, those western states, we would have heard about them. And I think you're correct, if some breakthrough comes along we may have a chance to revisit any decision of ours, perhaps. I'm not going to predict the future on what breakthroughs will come along, because I happen to agree with you, as you get closer to zero hour negotiations change.

My sense would be that we move ahead and take action today one way or another. And if the decision is to make a motion to find the merger not in the public interest, we certainly could entertain that. Commissioner Reha has indicated that she has a position that some of the -- some or all, I don't know, of these conditions would be required to help her meet that determination. I'd be open to that discussion. But I think if there's a threshold

three fail, it's got reduced bond ratings, I think the elephant in the living room, which is the best deal we're ever going to look at, there's no record evidence to support that.

Page 99

But, in any event, I don't see the need for urgency, other than we want to get it done, if we're going to do it, so that they can close on June 1st. Why February 10th as opposed to March I is compelling, I don't see, given this record.

CHAIR BOYD: I'll entertain any kind of motion about delaying the record, rejecting the merger, and if I don't hear that we'll move on, assuming we're going to work through the conditions.

Commissioner O'Brien.

COMMISSIONER O'BRIEN: I'll try it.

I'll move to table this until our first meeting in March, to allow the -- our staff and the intervenors and the petitioners to work out the agreements that Commissioner Reha has in mind and to give the new commissioner an opportunity to advise us with whether he wants to comment on this or not.

CHAIR BOYD: Discussion of the motion?
COMMISSIONER WERGIN: Mr. Chair, I'd love to, but there's no discussing.

CHAIR BOYD: But there are other pieces

Page 98

question of whether this is in the public interest or not, straight up, straight down, that that's an issue we should address or move on.

COMMISSIONER O'BRIEN: Mr. Chairman. CHAIR BOYD: Commissioner O'Brien.

COMMISSIONER O'BRIEN: As we struggle with this public interest conundrum, we can say that the views of the new commissioner aren't particularly relevant to the docket at hand, and I'd be inclined to maybe join in that perspective if I knew why the former commissioner approved the deal. If there was a record, if there was evidence, there was some weighing and some discussion. But we don't have that. And so now if two people say, yeah, it's okay, at least that we have a firewall.

And what I'm trying to do is maintain the integrity of our finding of public interest. It's a nationwide deal, other states have done it. We went along, but we had two commissioners that said, yeah, go ahead and do that. Right now we have one -- and if, God forbid, the thing goes south, I can tell you the new commissioner is not going to say I signed off on that, nobody asked me. So just think about that.

I mean, this -- we are on notice, two or

Page 100

in here about suggesting -- I understand that, but there are other pieces in here about staff and parties working out agreements, and as of the moment we don't know what Commissioner Reha's thoughts are. That seems a little problematic.

COMMISSIONER O'BRIEN: I'm just trying to be respectful to Commissioner Reha to allow her to have some time to develop that.

CHAIR BOYD: All right. Since I discussed something that's not discussable --

COMMISSIONER PUGH: You just restated the motion.

CHAIR BOYD: Yeah. We'll go to a vote.

Commissioner Wergin, do you want to help me on process?

COMMISSIONER WERGIN: Let me work on the motion.

CHAIR BOYD: All right. Take your time.
COMMISSIONER WERGIN: Commissioner

O'Brien, for clarification. CHAIR BOYD: Not discussion.

COMMISSIONER WERGIN: Right.

When you say the motion is for the parties and the staff to work with Commissioner Reha on agreements, that says to me that your motion

	Page 101		Page 103
1	anticipates that we could have a better product if	1	how to contact the Commissioner of the Department of
2	we table this and allow some agreements to take	2	Commerce, but how do you intend to proceed going
3	place. Is that correct?	3	forward? Commissioner Mr. Oberlander.
4	COMMISSIONER O'BRIEN: Yeah, Commissioner	4	MR. OBERLANDER: Commissioners, given the
5	Wergin, here's where I'm at. If Commissioner Reha	5	unusual nature of this motion and the significant
6	says the parties have worked out a deal, I've looked	6	issues that need to be considered, I think that
7	at it, it's fine with me, and the new commissioner	7	staff will have to go back and discuss it
8	says I've looked at it, it's fine with me, I'll be	8	internally, basically, to formulate an appropriate
9	voting in support of it. All I'm asking is that we	9	way to move forward. We've never done anything
10	put the collection, have those two pieces. If that	10	quite like this before.
11	*	11	-
12	clarifies my motion.	12	CHAIR BOYD: All right. Commissioner
	COMMISSIONER WERGIN: Mr. Chair, and your		Pugh.
13	motion was until the first meeting in March; is that	13	COMMISSIONER PUGH: Mr. Chair, perhaps
14	correct?	14	back to like courtroom days, I'd suspect that
15	COMMISSIONER O'BRIEN: Yes.	15	counsel for the commissioner will relay to the
16	CHAIR BOYD: You might want to make that	16	commissioner that we that this order will be
17	the first meeting in March where we can have five	17	forthcoming and we'll be looking for input.
18	Commissioners present.	18	CHAIR BOYD: I'm not worried about that
19	COMMISSIONER O'BRIEN: Yes.	19	part.
20	CHAIR BOYD: And there's a commission	20	COMMISSIONER PUGH: That part should be
21	slot.	21	solved.
22	COMMISSIONER O'BRIEN: And it's the first	22	CHAIR BOYD: It's the other half I'm
23	duly constituted meeting of the Commission, I don't	23	worried about.
24	know that I have to	24	COMMISSIONER PUGH: Sometimes the part
25	MR. OBERLANDER: And with the additional	25	you don't worry about becomes a problem too. But
	Page 102		Page 104
1	caveat that other cases move as needed to	1	CHAIR BOYD: Well, that's true.
2	accommodate that scheduling.	2	COMMISSIONER REHA: If I might comment.
		~	COMMISSIONER REFIA. II I IIIgit comment.
